Sir Raymond Unwin Architect Planner And Visionary:

Sir Raymond Unwin, Architect, Planner, and Visionary Frank Jackson, 1985 **Visionaries and Planners** Stanley Buder, 1990 In this book Stanley Buder examines the Garden City movement from its origins in mid nineteenth century England to its subsequent development and elaboration in twentieth century America The Garden City movement emphasized green belts around cities but was not identified exclusively with suburban development Much of the city planning which formed the basis for the Garden City movement was based upon designing the ideal community But this sense of idealism was soon lost with the transfer of the movement to America and indeed it was unable to sustain itself in the communities of its origin in England **Raymond Unwin** Mervyn Miller, 1992 Sir Raymond Unwin 1863 1940 was one of the best known pioneers of town planning Inspired by William Morris and Fabianism he designed new prototypes for working class housing The design of 20th century housing new suburbs and new towns perhaps owes more to Unwin and to the works in Letchworth New Earswick and Hampstead Garden Suburb than to any other individual *Artisans and Architects* Mark Swenarton, 1988-12-19 **The Architecture of Edwin Maxwell Fry and Jane Drew** Iain Jackson, Jessica Holland, 2016-03-16 Maxwell Fry and Jane Drew were pioneers of Modern Architecture in Britain and its former colonies from the late 1920s through to the early 1970s As a barometer of twentieth century architecture their work traces the major cultural developments of that century from the development of modernism its spread into the late colonial arena and finally to its re evaluation that resulted in a more expressive formalist approach in the post war era This book thoroughly examines Fry and Drew s highly influential Tropical Architecture in West Africa and India whilst also discussing their British work such as their post World War II projects for the Festival of Britain Harlow New Town Pilkington Brothers Headquarters and Coychurch Crematorium It highlights the collaborative nature of Fry and Drew s work including schemes undertaken with Elizabeth Denby Walter Gropius Denys Lasdun Pierre Jeanneret and Le Corbusier Positioning their architecture writing and educational endeavours within a wider context this book illustrates the significant artistic and cultural contributions made by Fry and Drew throughout their lengthy careers **The Cambridge Companion to John Ruskin** Francis O'Gorman, 2015-10-29 John Ruskin 1819 1900 one of the leading literary aesthetic and intellectual figures of the middle and late Victorian period and a significant influence on writers from Tolstoy to Proust has established his claim as a major writer of English prose This collection of essays brings together leading experts from a wide range of disciplines to analyse his ideas in the context of his life and work Topics include Ruskin s Europe architecture technology autobiography art gender and his rich influence even in the contemporary world This is the first multi authored expert collection to assess the totality of Ruskin s achievement and to open up the deep coherence of a troubled but dazzling mind A chronology and guide to further reading contribute to the usefulness of the volume for students and scholars **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history

available **Food and Urbanism** Susan Parham, 2015-02-26 Cities are home to over fifty percent of the world's population a figure which is expected to increase enormously by 2050 Despite the growing demand on urban resources and infrastructure food is still often overlooked as a key factor in planning and designing cities Without incorporating food into the design process how it is grown transported and bought cooked eaten and disposed of it is impossible to create truly resilient and convivial urbanism Moving from the table and home garden to the town city and suburbs Food and Urbanism explores the connections between food and place in past and present design practices The book also looks to future methods for extending the gastronomic possibilities of urban space Supported by examples from places across the world including the UK Norway Germany France Spain Portugal Greece Romania Australia and the USA the book offers insights into how the interplay of physical design and socio spatial practices centred around food can help to maintain socially rich productive and sustainable urban space Susan Parham brings together the latest research from a number of disciplines urban planning food studies sociology geography and design with her own fieldwork on a range of foodscapes to highlight the fundamental role food has to play in shaping the urban future *The Common Good and the Global Emergency* T. J. Gorringer, 2011-02-03 Provides a theoretical and political framework of the common good and applies this to the built environment The working class in mid-twentieth-century England Ben Jones, 2018-09-30 This book maps how working class life was transformed in England in the middle years of the twentieth century National trends in employment welfare and living standards are illuminated via a focus on Brighton providing valuable new perspectives of class and community formation Based on fresh archival research life histories and contemporary social surveys the book historicises important cultural and community studies which moulded popular perceptions of class and social change in the post war period It shows how council housing slum clearance and demographic trends impacted on working class families and communities While suburbanisation transformed home life leisure and patterns of association there were important continuities in terms of material poverty social networks and cultural practices This book will be essential reading for academics and students researching modern and contemporary social and cultural history sociology cultural studies and human geography
