Technique And Enlightenment Limits Of Instrumental Reason:

Technique and Enlightenment Ian H. Angus, 1984 This volume co published with the Center for Advanced Research in Phenomenology presents the argument that a philosophy of technology is a central component of a contemporary political philosophy It provides a theoretical groundwork for the encounter of phenomenology and critical theory Written for courses in social and political theory phenomenology and critical theory Primal Scenes of Communication Ian Angus, 2000-09-25 Proposes a new theory of communication called comparative media theory **Technique and Enlightenment** Ian H.

Angus, 1980 **Re-Thinking Reason** Kerry S. Walters, 1994-01-01 Challenges the widespread assumption that good thinking is logical thinking and that college students should learn better after taking a course in critical thinking The 14 contributors argue for and provide a richer model of thinking that acknowledges the importance of faculties traditionally downplayed or discouraged Addressed to educators Annotation copyright by Book News Inc Portland OR *The Politics and Ethics of Transhumanism* Alexander Thomas, 2024-07-30 Available open access digitally under CC BY NC ND licence Transhumanism is a philosophy which advocates for the use of technology to radically enhance human capacities This book interrogates the promises of transhumanism arguing that it is deeply entwined with capitalist ideology In an era of escalating crisis and soaring inequality it casts doubt on a utopian techno capitalist narrative of unending progress In critiquing the transhumanist project the book offers an alternative ethical framework for the future of life on the planet As the debates around the advancement of AI and corporate led digital technologies intensify this is an important read for academics as well as policy makers **An Ethic for Health Promotion** David R. Buchanan, 2000-01-20 What is the goal of public health promotion today If the leading causes of mortality nowadays are primarily attributable to lifestyle behaviors is the purpose of research to develop the power to change those behaviors in the same way that science has been able to control infectious diseases Or is the quest for effective behavior modification techniques antithetical to the idea of promoting well being defined in terms of individual autonomy dignity and integrity An Ethic for Health Promotion explores these questions

Groundwork of Phenomenological Marxism Ian H. Angus, 2021-07-26 In Groundwork of Phenomenological Marxism Crisis Body World Ian H Angus investigates the crisis of reason in a contemporary context Beginning with Edmund Husserl's The Crisis of the European Sciences and Transcendental Phenomenology Angus connects the phenomenology of human motility to Marx's ontology of labor in Capital and shows its basis in natural fecundity excess He argues that the formalization of reason creates an inability to foster differentiated community as expected by both Husserl and Marx and that the formalization of human motility by the regime of value reveals the ontological productivity of natural fecundity showing that ecology is the contemporary exemplary science Addressing the crisis requires a philosophy of technology especially digital technology and a dialogue between cultural civilizational lifeworlds which surpasses Husserl's assumption that Europe is the home of reason Angus's overall conception of phenomenology is Socratic in that it is concerned with the

presuppositions and applications of knowledge forms in their lifeworld grounding He further shows that the contemporary event is the epochal confrontation between planetary technology and place based Indigeneity This book lays out the fundamental concepts of a systematic phenomenological Marxian philosophy **Descent of the Dialectic** Michael J. Thompson,2024-08-01 This book reconstructs the concept and practice of dialectics as a means of grounding a critical theory of society At the center of this project is the thesis of phronetic criticism or a form of reason that is able to synthesize human value with objective rationality This book argues that defects in modern forms of social reason are the result of the powers of social structure and the norms and purposes they embody Increasingly modern societies are driven not by substantive values concerning human good but by the technical imperatives of economic management leading to a cultural condition of nihilism that has eroded dialectical consciousness The first half of the book demonstrates the various ways that social power erodes and undermines critical rational forms of consciousness The second part of the book constructs an alternative basis for critical reason by showing how it requires seeing human value as essentially ontological that is constituted by objective forms of sociality that either promote human freedom or pervert our capacities and drive toward pathological forms of life The philosophical claim is that a critical theory of ethics must be rooted in these concrete forms of life and that this will serve as a critical vantage point for critical political judgment and transformational praxis *Descent of the Dialectic* will be of interest to researchers working in philosophy political theory social theory and critical theory *Marxism and Phenomenology* Bryan Smyth,Richard Westerman,2021-10-25 *Marxism and Phenomenology The Dialectical Horizons of Critique* edited by Bryan Smyth and Richard Westerman offers new perspectives on the possibility of a philosophical outlook that combines Marxism and phenomenology in the critique of capitalism Although Marxism s focus on impersonal social structures and phenomenology s concern with lived experience can make these traditions appear conceptually incompatible the potential critical force of a theoretical reconciliation inspired several attempts in the twentieth century to articulate a phenomenological Marxism Updating and extending this approach the contributors to this volume identify and develop new and previously overlooked connections between the traditions offering new perspectives on Marx Husserl and Heidegger exploring themes such as alienation reification and ecology and examining the intersection of Marxism and phenomenology in figures such as Michel Henry Walter Benjamin and Frantz Fanon These glimpses of a productive reconciliation of the respective strengths of phenomenology and Marxism offer promising possibilities for illuminating and resolving the increasingly intense social crises of capitalism in the twenty first century **Technosystem** Andrew Feenberg,2017-10-02 We live in a world of technical systems designed in accordance with technical disciplines and operated by technically trained personnel a unique social organization that largely determines our way of life Andrew Feenberg s theory of social rationality represents both the threats of technocratic modernity and the potential for democratic change
