Air Act revisions in 1972 to the Clean Water Act and the 1973 Endangered Species Act Under Nixon actions were taken to protect the oceans forests coastal zones and grasslands while regulating chemicals pesticides and garbage The authors analyze the full range of transformations during the Green Years from the creation of entirely new pollution control industries to backpacking becoming mass recreation to how revelations about chemical exposure spurred the natural food movement And not least the tectonic shift in the political landscape of the United States with the western states becoming Republican bastions and centers of ongoing backlash against the federal government The Green Years 1964 1976 is the story of environmental progress in the midst of war and civil unrest and of the lessons we can learn for our future All Aboard!
