Depth Leadership Hélène Smit, 2025-06-30

Depth Leadership guides leaders to implement their ethical responsibility to ensure that individuals, communities and the planet co-exist as creatively, constructively and sustainably as possible. The book explores a transformative leadership approach based on a foundation of depth psychology and systems thinking in which leaders work beneath and beyond. By working beneath, the leader should actively pursue integration of the whole self or psyche, both the conscious on the surface self and the unconscious under the surface self, which includes the body and the imagination to unlock potential, resolve conflict and help the individual psyche to thrive. Leaders must pursue integration and build healthy relationships between people to help groups and communities thrive. They need to consider factors beyond their own group or organisation, using an integrative approach towards larger systems including governance systems and the natural environment to ensure a thriving planet. Grounded in academically sound theory but discussed from the perspective of a layperson and extensively illustrated by award-winning artist Katherine Glenday, the ideas discussed in this book will benefit anyone leading a group or a team, whether it be in a formal organisation or a more informal social setting.
