The Great Lakes North Americas Inland Sea:

Mastering the Inland Seas Theodore J. Karamanski, Theodore Karamanski, 2020-04-21 Theodore J Karamanski s sweeping maritime history demonstrates the far ranging impact that the tools and infrastructure developed for navigating the Great Lakes had on the national economies politics and environment of continental North America Synthesizing popular as well as original historical scholarship Karamanski weaves a colorful narrative illustrating how disparate private and government interests transformed these vast and dangerous waters into the largest inland water transportation system in the world Karamanski explores both the navigational and sailing tools of First Nations peoples and the dismissive and foolhardy attitude of early European maritime sailors He investigates the role played by commercial boats in the Underground Railroad as well as how the federal development of crucial navigational resources exacerbated sectionalism in the antebellum United States Ultimately *Mastering the Inland Sea* shows the undeniable environmental impact of technologies used by the modern commercial maritime industry This expansive story illuminates the symbiotic relationship between infrastructure investment in the region s interconnected waterways and North America s lasting economic and political development **St. Lawrence**

Throughout the history of the Great Lakes many organizations have played important roles in the growth and development of the water system *Charting the Inland Seas* highlights the work done by the U S Lake Survey one of the most notable yet least known organizations in the history of the Great Lakes With the first great influx of settlers into the Great Lakes region came the need for extensive surveys and accurate navigational charts In the 1830s shipowners and masters pressed the federal government to begin a thorough survey of the Great Lakes in order to make available detailed maps and charts of the various routes by which the lakes could safely be sailed In 1841 Congress appropriated 15 000 for the Corps of Topographical Engineers to begin a survey of the northern and northwestern lakes thus marking the formation of the United States Lake Survey Arthur M Woodford documents how the role and responsibility of the Lake Survey grew as conditions on the Great Lakes changed over the next 135 years Great Lakes ships evolved into larger vessels with greater drafts creating the need for new and more exact surveys and charts In order to more accurately predict the water levels of the Great Lakes special forecasting techniques evolved When erosion of beaches threatened to destroy valuable lakefront property extensive studies by the Lake Survey determined the causes And as the number of recreational crafts increased a program began for the design and publication of large scale book charts for boaters to use In addition the U S Lake Survey was one of the military s major suppliers of maps and charts during the two world wars and the Korean conflict In 1970 the federal government established the National Oceanic and Atmospheric Administration NOAA as part of the Department of Commerce and brought together in a single agency the major federal programs dealing with the seas and the atmosphere and the U S Lake
