The Green Dream:

The Green Dream Olga Cabral,1990 **Gates of Hell** Daniel Jupp,2023-09-26 In this powerful and hard hitting analysis Daniel Jupp examines the enormous personal power and political influence of one of the world's richest men The Gates of Hell covers everything from the childhood influences that shaped Bill Gates to the Microsoft years and his current incarnation as the most powerful philanthropist on the planet Jupp traces just how vast and unaccountable the influence of Gates has become including his leading role in current global health policies and the drive toward a net zero Green Revolution which threatens the economic and social fabric of the entire western world Firmly asking the questions that mainstream commentators often avoid Jupp supplies a damaging criticism not just of Gates himself but of the political corruption and inertia which has allowed one man to effectively direct key global policies adopted by multiple nations without any democratic accountability From educational and health campaigns of dubious efficacy and unexamined risk to green policies that make little rational sense Jupp shows how the public private funding hybrid championed by The Gates Foundation allows a powerful billionaire to push health agriculture and science policies in directions which profit investors whilst harming others who have no say in any part of the process Now more than ever following the COVID 19 pandemic the consequences of lockdowns mass mRNA vaccinations and the advances of net zero policy questioning why one man who has never been elected to office has such influence on these decisions is vital **The Poisoner** Gail Bell,2003-10-14 Years after Dr William Macbeth died his ornate medicine case passed to his estranged son Over the protests of his family the son buried it deep in the ground out of sight and out of reach Then ten years old Macbeth's granddaughter Gail Bell watched the mysterious case of elixirs arrive at her home She watched her father treat it like a poison chalice Only decades later would she understand why the case concealed evidence of her family's deadly secret In 1927 Macbeth was accused of poisoning two of his sons He never stood trial Bell determined to discover how this calm warm and caring healer could become a cunning murderer and evade detection eventually uncovered the dark secrets that her father had tried to hide from the world But as the unexpected twists of her investigation reveal nothing is as straightforward as it seems At the same time she explores what the crime of poisoning reveals about humanity through the perspectives of myth history fiction and the great poison trials A pharmacist by profession and the granddaughter of a suspected poisoner by circumstance she is perfectly placed to revisit the cases of Cleopatra Emma Bovary Napoleon's doctor Harold Shipman and Dr Crippen and she is equally well suited to chronicle the devastating effects of poison's many forms from hemlock and belladonna to arsenic and strychnine Poison is at once a fascinating history of the science and sociology of poisoning and a true first person account of one woman's struggle to understand its mysterious role in her own family's murderous history *Call Your "Mutha"* Jane Caputi,2020 The ecocide and domination of nature that is the Anthropocene does not represent the actions of all humans but that of Man the Western and masculine identified corporate military intellectual and political class that long has masked itself as the

civilized and the human In this book Jane Caputi looks at two major myths of the Earth one ancient and one contemporary and uses them to devise a manifesto for the survival of nature which includes human beings in our current ecological crisis These are the myths of Mother Earth and the Anthropocene The former personifies nature as a figure with the power to give life or death and one who shares a communal destiny with all other living things The latter myth sees humans as exceptional for exerting an implicitly sexual domination of Mother Earth through technological achievement from the plow to synthetic biology and artificial intelligence Much that we take for granted as inferior or taboo is based in a splitting apart of inherent unities culture nature up down male female spirit matter mind body life death sacred profane reason madness human beast light dark The first is valued and the second reviled This provides the framework for any number of related injustices sexual racial and ecological This book resists this pattern in part by deliberately putting the dirty back into the mind the obscene back into the sacred and vice versa Ecofeminism and Environmental Justice argue for the significance and reality of the Earth Mother Caputi engages specifically with the powers of that Mother ones made taboo and even obscene throughout heteropatriarchal traditions Jane Caputi rejects misogynist and colonialist stereotypes and examines the potency of the Earth Mother in order to deepen awareness of how our relationship to the Earth went astray and what might be done to address this Drawing upon Indigenous and African American ecofeminism ecowomanism green activism femme queer and gender non binary philosophies literature and arts Afrofuturism and popular culture images Call Your Mutha contends that the Anthropocene is not evidence so much of Man s supremacy but instead a sign that Mother Nature Earth faced with disrespect is turning away withdrawing the support systems necessary for life and continuance Caputi looks at contemporary narratives and artwork to consider the ways in which respect for the autonomous and potent Earth Mother and a call for their return has already reasserted itself into our political and popular culture

Fire Ready Jane Rogers, 2024-12-11 In the Australian outback a lone farmer prepares her homestead for the latest in a growing wave of bushfires In Oxfordshire an elderly man protests the cutting down of an ancient beech tree by chaining himself to its trunk In the depths of space two evacuees from a scorched and barren Earth consider whether to tell the rest of the crew that their old home may be starting to heal The stories in Jane Rogers much awaited second collection shine an unflinching light on the future health of the planet and the prospects for its greediest tenants us With stories spanning hundreds of years from the far side of the 22nd century all the way back to the darkest days of lockdown they pose questions about personal responsibility that cannot be easily answered A wise compassionate and surprising collection which moves seamlessly through time and space illuminating all the joys and tragedies of the current moment Rogers reminds us of the extra ordinary flexibility and vigour of the short story Alice Jolly Jane Rogers stories are delicate studies in what makes us human Each story creates a pellucid space in a chaotic world her characters grapple with life and engage in the age old struggle to be decent human beings Economical bold and nuanced this is a beautifully humane collection and one to be savoured Lesley Glaister *National Healing* Claude
