The Greening Of Canada Federal Institutions Decisions:

The Greening of Canada G. Bruce Doern, Thomas Conway, 1994-12-15 Environmental matters have become increasingly important in Canadian and world policy agendas In this study G Bruce Doern and Thomas Conway trace the development of Canadian environment policy giving an in depth account of twenty years of environmental politics politicians institutions and decisions as seen through the evolution of Ottawa s policy agency Environment Canada The Greening of Canada is an extensively researched look at the entire period from the early 1970s to the present and is the most complete and integrated analysis yet of federal environmental institutions and key decisions From Great Lakes pollution to the Green Plan from the Stockholm Conference to the post Rio Earth Summit era the authors deal with both domestic and international events and influences on Ottawa s often abortive efforts to entrench a green agenda into national politics The book explores the crucial relationships of institutional and political power directing attention at the DOE and its parade of ministers intra cabinet battles federal provincial relations business relations and public opinion and international and Canada U S relations It also examines important topics from acid rain policy to the politics of establishing national parks and from the Green Plan to the realities of environmental enforcement Employing a framework cast as the double dynamic of environmental policy making the authors show the growing struggle between the management of power among key institutions and the need to accommodate a biophysical realm characterized by increased uncertainty as well as scientific and technological controversy

Politics, Policy, and Government in British Columbia R. Kenneth Carty, 1996-09-23 Politics Policy and Government in British Columbia examines the political life of Canada s dynamic Pacific province Each of the seventeen chapters written by well known experts provides an up to date portrait and analysis of one of the many faces of B C politics Taken together they provide a clear and comprehensive overview of the dominant themes and issues that have been the distinguishing features of the province s political life Key elements of the book include sections on the political setting with discussions of BC s political culture and economy and its relations with the rest of Canada and its own Native communities B C style politics which focus on electoral and parliamentary party politics the changing place of women in BC public life and the critical role of the media in explaining it all to British Columbians governing the province with accounts of the premier and cabinet the bureaucracy that delivers most government services and the complex system from the police to the courts that provides the administration of justice and the rule of law and contemporary policy issues with clear explanations of the intricacies of fiscal and social policy analyses of recent conflicts over forest policy and environmental protection a discussion of the role of lobbyists and an examination of what difference is made when NDP governments are elected Anyone interested in B C or its politics will find this book an informative up to date record of the processes and events that have marked B C s past and will continue to shape its future *Canadian Natural Resource and Environmental Policy, 2nd ed.* Melody Hessing, Michael Howlett, Tracy Summerville, 2011-11-01 In this new and updated edition the authors once again examine policy making in one of the most

significant areas of activity in the Canadian economy natural resources and the environment and discuss the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management Using an integrated political economy and policy perspective the book provides an analytic framework from which the foundation of ideological perspectives administrative structures and substantive issues are explored Departing from traditional approaches that emphasize a single discipline or perspective it offers an interdisciplinary framework with which to think through ecological political economic and social issues It also provides a multi stage analysis of policy making from agenda setting through the evaluation process The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date Its illumination of the key elements of government policy making in this critical sector and its new outline of the evolution of the Kyoto Protocol makes it a useful textbook and resource for students of environmental and public policy policy makers and environmental organizations

Rules, Rules, Rules, Rules G. Bruce Doern, Robert Johnson, 2006-01-01 Rules Rules Rules Rules considers various sectors where rule making spans all or most of the four levels of jurisdiction international federal provincial and city or local in areas such as food safety investment and trade forestry drinking water oil and gas and emergency management

Water Resources of North America Asit K. Biswas, 2013-12-17 Leonardo da Vinci the eminent Renaissance scholar and philosopher said water is the driver of nature Many may have considered it to be an overstatement in the past but at the beginning of the third millennium no sane individual would disagree with Leonardo s view Water is becoming an increasingly scarce resource for most of the world s citizens The current trends indicate that the overall situation is likely to deteriorate further at least for the next two decades unless the water profession eschews its existing business as usual practices which can only allow incremental changes to occur Somewhat surprisingly the water profession as a whole neither realised nor appreciated the gravity of the global water situation as late as 1990 even though a few serious scholars have been pointing out the increasing criticality of the situation from around 1982 For example the seriousness of the crisis was not a major issue either at the International Conference on Water and the Environment which was organised by the UN system in Dublin and also at the UN Conference on Environment and Development at Rio de Janeiro Held in 1992 both are considered to be important events for the water sector of the past decade It is now being increasingly recognised that the Dublin Conference was poorly planned and organised and thus not surprisingly it produced very little if any worthwhile and lasting results

Passing the Buck Kathryn Harrison, 2011-11-01 Within Canada the renewed importance of environmental issues in recent years has given rise to legislative and regulatory initiatives by both the federal and provincial governments which in turn has led to increased intergovernmental conflict Recent jurisdictional disputes over the Quebec government s James Bay hydro development the Al Pac pulp mill and Oldman River dam in Alberta and the Rafferty Alameda dam in Saskatchewan to name but a few have led to

increasingly important debate on the appropriate balance of federal and provincial roles in environmental policy. *Passing the Buck* is the first in depth study of the impact of federalism on Canadian environmental policy. The book takes a detailed look at the ongoing debate on the subject and traces the evolution of the role of the federal government in environmental policy and federal provincial relations concerning the environment from the late 1960s to the early 1990s. The author challenges the widespread assumption that federal and provincial governments invariably compete to extend their jurisdiction. Using well researched case studies and extensive research to support her argument, the author points out that the combination of limited public attention to the environment and strong opposition from potentially regulated interests yields significant political costs and limited political benefits. As a result for the most part the federal government has been content to leave environmental protection to the provinces. In effect the federal system has allowed the federal government to pass the buck to the provinces and shirk the political challenge of environmental protection. Of particular importance to those in environmental studies, policy planning, political science and law, *Passing the Buck* makes an original contribution to the literature of Canadian federalism and environmental policy. It is timely both in light of growing awareness of environmental challenges facing Canada and its examination of how we and other countries around the world adapt and rearrange our political systems to cope with large scale ecological change.

Unnatural Law David R. Boyd, 2011-11-01. While governments assert that Canada is a world leader in sustainability, *Unnatural Law* provides extensive evidence to refute this claim. A comprehensive assessment of the strengths and weaknesses of Canadian environmental law, the book provides a balanced critical examination of Canada's record, focusing on laws and policies intended to protect water, air, land and biodiversity. Three decades of environmental laws have produced progress in a number of important areas such as ozone depletion, protected areas and some kinds of air and water pollution. However, Canada's overall record remains poor. In this vital and timely study, David Boyd explores the reasons why some laws and policies foster progress while others fail. He ultimately concludes that the root cause of environmental degradation in industrialized nations is excessive consumption of resources. *Unnatural Law* outlines the innovative changes in laws and policies that Canada must implement in order to respond to the ecological imperative of living within the Earth's limits. The struggle for a sustainable future is one of the most daunting challenges facing humanity in the 21st century. Everyone—academics, lawyers, students, policy makers and concerned citizens—interested in the health of the Canadian and global environments will find *Unnatural Law* an invaluable source of information and insight. In the Chamber of Risks William Leiss, 2001-11-10. The essential problem is the failure to recognize that controversies over risks are normal events in modern society and as such will be with us for the foreseeable future. Three key propositions define these events: risk management decisions are inherently disputable; public perceptions of risk are legitimate and should be treated as such; the public needs to be intensively involved in the processes of risk evaluation and management. Leiss and his collaborators

chronicle these organizational risks in a set of detailed case studies on genetically modified foods cellular telephones the notorious fuel additive MMT pulp mill effluent nuclear power toxic substances legislation tobacco and the new type of moral risks associated with genetics technologies such as cloning Contributors include Debora L Van Nijnatten Sir Wilfred Laurier University Michael D Mehta University of Saskatchewan Stephen Hill University of Calgary ric Darier Greenpeace Greg Paoli Decisionalysis Risk Consultants Inc and Peter V Hodson Queen s University *Environmental Management on North America's Borders* Richard Kiy,John D. Wirth,1998 Comprises 10 contributions that provide an introduction to the range of environmental issues on both borders and an understanding of the dynamics currently transforming North America Specific topics include the British Columbia Washington Environmental Cooperation Council managing air quality in the Paso del Norte region crossborder environmental management and the informal sector and low level hazardous waste sites in Del Rio Dryden and Spofford Texas Intended for students of environmental management and North American border studies Annotation copyrighted by Book News Inc Portland OR **The Rise of Global Corporate Social Responsibility** Hevina S.
