The Grey Swan Happening of our Universe Maurice Perks,2024-03-01 This book is neither fact nor fiction It s something in the middle It s about the universe and time and is a book for ordinary inquisitive people to read Curious people who feel disconnected from much of the complex and jargon heavy logic about the universe and time that comes from scientific or religious quarters But the contents of this book might interest a broad segment of scientists causing them to raise their voices hands and arms in agreement or most probably disagreement Words like rubbish stupid and it s a na ve falsification may be uttered So be it This book is readable for the uninformed because most of it is in plain text and pictures with some elementary mathematics sprinkled here and there Various simple questions are posed as to why our universe exists and how it happened That happening was what the book terms a grey swan moment Time will not tell if that moment was even a moment because time is an earthly fabrication of our imagination and is not real Read this book and gain a fresh perspective on what has is and might happen
