Sociology Of The School:

The Middling Sorts Maureen T. Hallinan, 2000-04-30 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system

Education and Society Thurston Domina, Benjamin G. Gibbs, Lisa Nunn, Andrew Penner, 2019-08-20 Drawing on current scholarship Education and Society takes students on a journey through the many roles that education plays in contemporary societies Addressing students own experience of education before expanding to larger sociological conversations Education and Society helps readers understand and engage with such topics as peer groups gender and identity social class the racialization of achievement the treatment of immigrant children special education school choice accountability discipline global perspectives and schooling as a social institution The book prompts students to evaluate how schools organize our society and how society organizes our schools Moving from students to schooling to social forces Education and Society provides a lively and engaging introduction to theory and research and will serve as a cornerstone for courses such as sociology of education foundations of education critical issues in education and school and society

The Structure of Schooling Richard Arum, Irene R. Beattie, Karly Ford, 2014-11-13 The Structure of Schooling Readings in the Sociology of Education by Richard Arum Irene Beattie and Karly Ford exposes students to examples of sociological research on schools with a focus on the school as community Now in its Third Edition this engaging reader has broadened its scope even more presenting additional readings in particular related to the sociology of higher education The book draws from classic and contemporary scholarship to examine current issues and diverse theoretical approaches to studying the effects of schooling on individuals and society In addition to covering traditional areas such as stratification and racial inequality the book also veers off the beaten path including readings on such contemporary topics as bullying school shootings school

how pupils cope with schools The theoretical papers consider amongst other issues a developmental model of the growth of pupil strategies based on primary and secondary socialisation a discussion of interactionist empiricism which argues for co ordinated research between micro and macro perspectives and an extended overview of the general sociological background of work on teacher and pupil strategies The empirical articles consider a number of themes ranging from strategies employed in answering teacher questions to the power and influence of the pupil peer group in the development of attitudes and behaviour

The Sociology of the School M. D. Shipman,1969 **The Social Organization of Schools** Maureen T. Hallinan,2013-06-29 This volume addresses key issues in the sociology of education concerning how schools are organized for instruction and what processes link school organization and instruction to educational achievement The content of the chapters represents a shift in focus from traditional and even recent themes in sociology of education including the study of school effects and of classroom processes to a concern with the social organization of schools and its consequences for student outcomes Rather than reviewing or evaluating existing research the chapters present new and developing conceptualizations of the schooling process and provide theoretical models to guide future empirical work on schools A unique feature of this book is its heavy emphasis on theory Each chapter presents a theoretical model or argument concerning an issue of central importance in sociology of education The empirical analyses and simulations that are included are often more for illustrative purposes than for rigorous hypothesis testing and some chapters have no data analysis at all The major strength of the volume therefore lies in the new conceptualizations and reconceptualizations it provides of fundamental processes relating school organization to student learning Theoretical work such as this is exactly what is needed in an area that has traditionally been for the most part empirical and atheoretical Another important feature of this volume is the various approaches it presents to the study of school organization
