Acting for the Common Good Michael J. McGrath,2023-08-08 The goods that we pursue in our lives are for us first and foremost goods that are particular and personal and thus goods that are immediate to our attention Not readily apparent to us are goods necessary for the

flourishing of our lives but that can be attained by us only in consort with others and thus realized only through collective action. Such goods are common goods. The wider the good, the more extensive must be the human cooperation to realize the good. A stable, orderly society and a habitable planetary environment are common goods that can be realized only in and through the cooperation of all for the benefit of all. That all contribute to the shared good of the whole is a matter of justice, social justice. Acting for the Common Good undertakes the study of social justice in light of the common good, this from the viewpoint of Catholic social teaching which draws upon the tradition of the common good that is articulated classically in the philosophy of Aristotle and the theology of Thomas Aquinas and in the modern day social thought and authoritative teachings of the Catholic Church.

Methodology of Relational Sociology Elżbieta Hałas, 2023-12-30. This is the first book addressing explicitly and specifically the methodological issues of relational sociology and more broadly of the new relational paradigm in social sciences. The dynamically developing relational movement in social and cultural sciences is fueled by various classical and contemporary theoretical inspirations. Relational approaches propose various models of relational analyses, such as field analysis, social space analysis, network analysis, or the critical realist relational heuristic. The relational turn, which promotes interdisciplinarity in research, simultaneously reflects the drive towards an innovative reconstruction of sociology. Contemporary relational sociology is at the forefront of the relational

movement The program of relational sociology is still being shaped frequently becoming the subject of discussions with different standpoints expressed The aim of this book is to reflect on various relational approaches and models of relational analysis Answers to two basic questions are sought Are there foundations for a methodological unity of relational sociology despite the diversity of approaches And does relational sociology form a new paradigm To answer these questions it is necessary to investigate differences between the relational paradigm and the earlier competing sociological paradigms The answers to key questions show what innovations the methodology of relational sociology brings i e what are the methodological consequences of the relational concept of the social fact The broadly defined horizon of methodological issues is presented The book creates an open space for discussion on various approaches and varieties of relational analysis as well as the possibility of their methodological synthesis within relational sociology
