## **Soldiers Society And National Security:**

Soldiers, Society, and National Security Sam Charles Sarkesian, John Allen Williams, Fred B. Bryant, 1995 This text explores the response of the military to the changing strategic landscape and shifting US domestic and international priorities It looks at the roots of that response in the perceptions attitudes capabilities and self images of the military profession

**The US Military Profession into the 21st Century** Sam Sarkesian, Robert Connor, 2006-04-18 This brand new edition of The US Military Profession into the Twenty First Century re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and the US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general
