Introduction to Solid State Physics Charles Kittel,Paul McEuen,2018 Kittel s Introduction to Solid State Physics Global Edition has been the standard solid state physics text for physics majors since the publication of its first edition over 60 years ago The emphasis in the book has always been on physics rather than formal mathematics This book is written with the goal that it is accessible to undergraduate students and consistently teachable With each new edition the author has attempted to add important new developments in the field without impacting its inherent content coverage This Global Edition offers the advantage of expanded end of chapter problem sets

Solid State Astrophysics N.C. Wickramasinghe,D.J. Morgan,1975-12-31 Over the past decade the study of the formation and properties of interstellar grains has assumed a growing importance going much beyond what might have been guessed only a few years ago It has come to be understood that grains play a role in processes other than the simple absorption and scattering of starlight which was all that the astronomers of a generation ago considered to be their relevance Grains indeed play a critical role in controlling the temperature composition and states of aggregation of the whole interstellar medium Among the still mysterious problems is the origin of the vast clouds of obscuring material that is observed in radiogalaxies like NGC 5128 and M 82 which may well be associated with the explosions of very massive objects It is safe to say that from this growing field of study much still remains to be discovered The topics discussed in this volume

will make clear to the reader the range and versatility of the subjects F HOYLE FOREWORD by THE PRINCIPAL The Symposium on Solid State Astrophysics held in July 1974 brought to University College Cardiff a large and very distinguished gathering of astronomers It was the first time that such a collection of scholars absorbed with the problem of the systems of outer space had collected together in Wales and so provided a splendid spring board for the researches of the newly founded group of astronomers in the Department of Applied Mathematics and Astronomy at University College
