The Heritage Of The Kingdom Of Saudi Arabia:

The Heritage of the Kingdom of Saudi Arabia Wahbi Hariri-Rifai, Mokhless Hariri-Rifai, 1990 **Kingdom of Saudi Arabia**, 2015 **Saudi Arabia**, 1984 Cultural Heritage in the Arabian Peninsula Karen Exell, Trinidad Rico, 2016-04-22

Heritage projects in the Arabian Peninsula are developing rapidly. Museums and heritage sites are symbols of shifting national identities and a way of placing the Arabian Peninsula states on the international map. Global i.e. Western heritage standards and practices have been utilised for the rapid injection of heritage expertise in museum development and site management and for international recognition. The use of Western heritage models in the Arabian Peninsula inspires two key areas for research which this book examines: the obscuring of indigenous concepts and practices of heritage and expressions of cultural identity and the tensions between local community concepts of heritage and identity and the new national identities being constructed through museums and heritage sites at a state level.

Islamic Heritage Architecture IV S. Hernandez, 2022-09-13. Islamic architecture has enriched design with a wide variety of structural shapes, including among others unique arches, a wide variety of vaults and domes which allow for new forms to be developed. This volume deals with the design of many types of buildings in Islamic countries, including not only the better known public buildings like mosques, mausoleums, citadels and forts, but also houses and gardens, engineering works such as bridges and dams, irrigation systems and many others which have also had a profound impact on society. There is much to learn from past experiences to arrive at solutions that are environmentally sound and sustainable in the long term. As conventional energy resources become scarce, the Islamic design heritage can offer invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments. Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning. Consequently, many regions are losing their identity. The included research reviews these developments in the light of what the classical Islamic urban designs and architectures have to offer modern society.
