**Transcultural Essentialism** Adrian Carter, Marja Sarvimäki, 2021-11-04 This book introduces and defines the burgeoning concepts of transculturalism and essentialism and how they relate to one another as articulated with reference to the work of Jørn Utzon. It introduces critical contemporary perspectives of the design thinking and career of this renowned Danish architect internationally recognised for his competition winning iconic design for the Sydney Opera House, an outstanding exemplar of transcultural essentialism in architecture. Transcultural essentialism is analysed through the lens of critical regionalism and architectural phenomenology with emphasis on the sense of place and tectonics in Utzon's architectural works. It provides a new understanding of the Danish architect as an early proponent of a still emergent and increasingly relevant direction in architecture. Going beyond biographical studies, it presents a more comprehensive understanding of the broad range of transcultural influences that formed his thinking. The volume includes numerous previously unpublished photographs, drawings and interviews with Utzon's family members, former students and colleagues, offering a significant contribution to the existing body of knowledge for any architecture scholar interested in Utzon's work and design principles. The book also comprises a Foreword by eminent architecture theorist Juhani Pallasmaa in which he provides insights into the wider architectural and cultural context of Utzon's worldview.

*The Gateway Arch* Tracy Campbell, 2019-06-18 This fascinating, engaging history of St Louis's monument to American expansion reveals a story of greed, discrimination and community displacement. NextSTL.com Rising to a triumphant height of 630 feet, the Gateway Arch is one of the world's most widely recognized structures and attracts millions of tourists to St Louis every year. Envisioned in 1947 but not completed until the mid 1960s, its story is one of innovation and greed, civic pride and backroom deals. Weaving together social, political and cultural perspectives, historian Tracy Campbell uncovers the complicated and troubling history of this iconic symbol. In this revealing account, Campbell shows that the so-called Gateway to the West was the scheme of shrewd city leaders who were willing to steal an election, destroy historic buildings and drive out communities in order to make downtown St Louis more profitable. Campbell also tells the human story of the architect Eero Saarinen whose prize-winning design brought him acclaim but also charges of plagiarism and who didn't live to see the completion of his vision.

**Great Planning Disasters** Peter Hall, 1982-03-22 In this pathology of planning, Peter Hall briskly recounts the histories of five great planning disasters and two near disasters and analyzes the decisions of the professional bureaucrats, community activists and politicians involved in the planning process. He draws on an eclectic body of theory from political science, economics, ethics and long range future forecasting to suggest ways to forestall such grand mistakes in the future. For this edition, Hall has added a special introduction in which he reflects further on the sequels to these cautionary tales and on the moral planners and citizens should draw from them.
