The Pace Of Change Studies In Earlymedieval Chronology:

Transformation in Anglo-Saxon Culture Charles Insley, Gale R. Owen-Crocker, 2017-03-31 The five authoritative papers presented here are the product of long careers of research into Anglo Saxon culture In detail the subject areas and approaches are very different yet all are cross disciplinary and the same texts and artefacts weave through several of them Literary text is used to interpret both history and art ecclesiastical historical circumstances explain the adaptation of usage of a literary text wealth and religious learning combined with old and foreign artistic motifs are blended into the making of new books with multiple functions religio socio economic circumstances are the background to changes in burial ritual The common element is transformation the Anglo Saxon ability to rework older material for new times and the necessary adaptation to new circumstances The papers originated as five recent Toller Memorial Lectures hosted by the Manchester Centre for Anglo Saxon Studies MANCASS Cultural Transformations in Germania Secunda Berber S. van der Meulen-van der Veen, 2025-07-03 This book uses a multi variate approach to study the Late Roman Lower German frontier challenging the role of migration in settlement changes It highlights long term interactive processes and continuity in material culture styles supported by metallurgical analysis of copper alloy dress ornaments *The Cruciform Brooch and Anglo-Saxon England* Toby F. Martin, 2015 Cruciform brooches were large and decorative items of jewellery frequently used to pin together women s garments in pre Christian northwest Europe Characterised by the strange bestial visages that project from the feet of these dress and cloak fasteners cruciform brooches were especially common in eastern England during the 5th and 6th centuries AD This book provides a multifaceted holistic and contextual analysis of more than 2 000 Anglo Saxon cruciform brooches It offers a critical examination of identity in Early Medieval society suggesting that the idea of being Anglian in post Roman Britain was not a primordial tribal identity transplanted from northern Germany but was at least partly forged through the repeated prevalent use of dress and material culture *The Oxford Handbook of Anglo-Saxon Archaeology* Helena Hamerow, David A. Hinton, Sally Crawford, 2011-03-31 Written by a team of experts and presenting the results of the most up to date research The Handbook of Anglo Saxon Archaeology will both stimulate and support further investigation into a society poised at the interface between prehistory and history *Carolingian Connections* Joanna Story, 2017-05-15 The Anglo Saxon influence on the Carolingian world has long been recognised by historians of the early medieval period Wilhelm Levison in particular has drawn attention to the importance of the Anglo Saxon contribution to the cultural and ecclesiastical development of Carolingian Francia in the central decades of the eighth century What is much less familiar is the reverse process by which Francia and Carolingian concepts came to influence contemporary Anglo Saxon culture In this book Dr Story offers a major contribution to the subject of medieval cultural exchanges focusing on the degree to which Frankish ideas and concepts were adopted by Anglo Saxon rulers Furthermore by concentrating on the secular context and concepts of secular government as opposed to the more familiar ecclesiastical and missionary focus of Levison s

work this book offers a counterweight to the prevailing scholarship providing a much more balanced overview of the subject Through this reassessment based on a close analysis of contemporary manuscripts particularly the Northumbrian sources Dr Story offers a fresh insight into the world of early medieval Europe

Re-imagining Periphery Charlotta Hillerdal, Kristin Ilves, 2020-06-30 This edited volume delves into the current state of Iron Age and Early Medieval research in the North Over the last two decades of archaeological explorations theoretical vanguards and introduction of new methodological strategies together with a growing amount of critical studies in archaeology taking their stance from a multidisciplinary perspective have dramatically changed our understanding of Northern Iron Age societies The profound effect of 6th century climatic events on social structures in Northern Europe a reintegration of written sources and archaeological material genetic and isotopic studies entirely reinterpreting previously excavated grave material are but a few examples of such land winnings The aim of this book is to provide an intense and cohesive focus on the characteristics of contemporary Iron Age research explored under the subheadings of field and methodology settlement and spatiality text and translation and interaction and impact Gathering the work of leading established researchers and field archaeologists based throughout northern Europe and in the frontline of this new emerging image this volume provides a collective summary of our current understandings of the Iron Age and Early Medieval Era in the North It also facilitates a renewed interaction between academia and the ever growing field of infrastructural archaeology by integrating cutting edge fieldwork and developing field methods in the corpus of Iron Age and Early Medieval studies In this book many hypotheses are pushed forward from their expected outcomes and analytical work is not afraid of taking risks thus advancing the field of Iron Age research and also hopefully inspiring to a continued creation of new knowledge

The Making of the Slavs Florin Curta, 2001-07-12 This book offers an alternative approach to the problem of Slavic ethnicity in south eastern Europe between c 500 and c 700 from the perspective of current anthropological theories The conceptual emphasis here is on the relation between material culture and ethnicity The author demonstrates that the history of the Sclavenes and the Antes begins only at around 500 AD He also points to the significance of the archaeological evidence which suggests that specific artefacts may have been used as identity markers This evidence also indicates the role of local leaders in building group boundaries and in leading successful raids across the Danube Because of these military and political developments Byzantine authors began employing names such as Sclavines and Antes in order to make sense of the process of group identification that was taking place north of the Danube frontier Slavic ethnicity is therefore shown to be a Byzantine invention

The Pace of Change John Hines, Karen Høilund Nielsen, Frank Siegmund, 1999 Chronology is the factual basis for contextualising archaeology This collection of papers aims to integrate local chronological schemes with more comprehensive and general master chronologies The studies focus on Germanic or Germanised populations during and after the Roman Empire s fall in the West the rich Germanic archaeological sites provide a yardstick for other areas The authors also play close attention to terminology with definitions of major periods sub periods

and artefact types and to the relationship between typology and computerised quantitative and statistical techniques The papers all in English cover North West Europe Denmark and Britain Frisians and Their North Sea Neighbours John Hines, Nelleke IJssennagger, 2017 La 4e de couv indique As early as the 1st century AD learned Romans knew of more than one group of people living in north western Europe beyond their Empire's Gallic provinces whose names contained the element that gives us modern Frisian Those apparently were Celtic speaking peoples but that population seems to have completely replaced in the course of the convulsions that Europe underwent at the transition from the Ancient world to the Early Medieval in the 4th and 5th centuries The importance of linguistically Germanic Frisians as neighbours of the Anglo Saxons Franks Saxons and Danes in the centuries immediately following the fall of the Roman Empire in the West is widely recognized and yet these folk themselves remain enigmatic and the details of their culture and organization unfamiliar to many The Frisian population and their lands are the focal point of this volume although as is shown we often have to approach and to understand these people through comparison with or even through the eyes of their neighbours Empirically this perspective embraces all of the coastal communities of the North Sea region and their connexions with the Baltic shores Twelve separate but complementary papers present the most up to date discoveries research and interpretations following the story of the various Frisians through from the Roman Period to the next great period of disruption and change introduced by the Viking Scandinavians Methodologically the thorough combination and integration of linguistic textual and archaeological evidence offers a new multidisciplinary template and sets new standards for Early Medieval studies

Medieval Europe From Another Angle Florin Curta, 2025-05-29 While the Middle Ages represent a topic of perennial interest most studies have addressed the western parts of the European continent often from the angle of the written sources This volume examines an area less known in the literary and archaeological evidence The studies included therein provide significant insights into the history and archaeology of East Central and Eastern Europe during Late Antiquity and the early Middle Ages This is the first volume of essays explicitly to reassess the significance of the region as well as the role of the archaeological evidence in studying ethnicity in the Middle Ages particularly in the case of the Slavs and the Avars Because of its geographic chronological thematic and methodological scope this book offers a new perspective from a different angle on the analysis of the archaeological and written sources Some chapters focus on settlement sites others discuss artifacts from burial assemblages As well as advancing new models for the analysis of the written sources in relation to ethnicity Medieval Europe from Another Angle offers new approaches to the understanding of how ethnicity may have been constructed in the Middle Ages in material culture terms It will appeal to scholars and students alike studying Late Antiquity and the early Middle Ages with an interest in material culture and its use in building ethnic boundaries
