Inside the Pentagon Papers John Prados, Margaret Pratt Porter, 2004 Inside the Pentagon Papers addresses legal and moral issues that resonate today as debates continue over government secrecy and democracy's requisite demand for truthfully informed citizens In the process it also shows how a closer study of this signal event can illuminate questions of government responsibility in any era When Daniel Ellsberg leaked a secret government study about the Vietnam War to the press in 1971 he set off a chain of events that culminated in one of the most important First Amendment decisions in American legal history That affair is now part of history but the story behind the case has much to tell us about government secrecy and the public's right to know Commissioned by Secretary of Defense Robert McNamara the Pentagon Papers were assembled by a team of analysts who investigated every aspect of the war Ellsberg a member of the team was horrified by the government's public lies about the war discrepancies with reality that were revealed by the report's secret findings His leak of the report to the New York Times and Washington Post triggered the Nixon administration's heavy handed attempt to halt publication of their stories which in turn led to

The Year That Defined American Journalism W. Joseph Campbell, 2013-10-08 The Year that Defined American Journalism explores the succession of

remarkable and decisive moments in American journalism during 1897 a year of significant transition that helped redefine the profession and shape its modern contours This defining year featured a momentous clash of paradigms pitting the activism of William Randolph Hearst s participatory journalism of action against the detached fact based antithesis of activist journalism as represented by Adolph Ochs of the New York Times and an eccentric experiment in literary journalism pursued by Lincoln Steffens at the New York Commercial Advertiser Resolution of the three sided clash of paradigms would take years and result ultimately in the ascendancy of the Times counter activist model which remains the defining standard for mainstream American journalism The Year That Defined American Journalism introduces the year study methodology to mass communications research and enriches our understanding of a pivotal moment in media history **The Media in the Movies** Larry Langman,2015-07-11 Cynical news hounds grumbling editors snooping television newscasters inquisitive foreign correspondents probing newsreel cameramen and a host of others all can be found in this reference work to Hollywood s version of journalism from the early one reelers to modern fare over a thousand silent and sound films can be found Each entry includes title date of release distributor director screenwriter and major cast members These credits are followed by a brief plot summary and analysis cross references and other information The book is arranged alphabetically and includes a preface introduction bibliography a list of abbreviations appendices and an index of names The detailed introduction covers an historical survey of the topic with numerous film examples The work also includes a selection of stills from various films Letters of the Century Lisa Grunwald,Stephen J. ultimately resulted in the minimizing and misunderstanding of modern history's worst genocide. Laurel Leff, a veteran journalist and professor of journalism, recounts how personal relationships at the newspaper, the assimilationist tendencies of The Times' Jewish owner, and the ethos of mid-century America all led The Times to consistently downplay news of the Holocaust. It recalls how news of Hitler's final solution was hidden from readers and because of the newspaper's influence on other media from America at large. Buried by The Times is required reading for anyone interested in America's response to the Holocaust and for anyone curious about how journalists determine what is newsworthy. *Calling Elections* Thomas B. Littlewood, 1998. *Calling Elections: The History of Horse Race Journalism* is the story of the origins and evolution of the horse race tradition of political journalism in the United States. Thomas B. Littlewood examines how the treatment of elections as sporting events has come to overshadow the reporting of the campaign as a forum for the discussion of ideas. Baldwin of the Times Robert Davies, 2011-10-15. Hanson W. Baldwin was America's best known military writer and analyst in the 20th century, covering conflicts from World War II to the Vietnam War. He was the military editor of the New York Times for forty years, and his dispatches from Guadalcanal and the Western Pacific won him a Pulitzer Prize in 1943. This first biography of this Naval Academy graduate begins with an appreciation of the human and literary values learned from his Baltimore newspaper family. His midshipman years, 1920-1924, taught him the value of concentration. After three years of active service, he chose the life of a professional writer. A few days before the 1929 stock market crash, he joined the New York Times as a reporter. His career was advanced by the patronage of the Times publisher and by the talk of another European war in 1937. He won a Pulitzer Prize in 1943 for his Guadalcanal series. After 1945, he thought the atomic bomb to be of limited use on the battlefield as well as in the politics of the Cold War. His news scoops upset many but were in keeping with his determination to tell his readers what its government was doing. His continuing criticism of Secretary McNamara's management of the Vietnam War and the Times management's annoyance with his pro-war position contributed to his decision to retire in March 1968. Later, he could only observe and to complain over the decline of American values and its harmful effects on the military. After his retirement, he continued to write articles on military affairs for the news columns and Op-Ed page of the New York Times.
