The Sense of Being Stared At Rupert Sheldrake, 2013-06-22 Explores Rupert Sheldrake's more than 25 years of research into telepathy, staring and intention, precognition and animal premonitions. Shows that unexplained human abilities such as the sense of being stared at and phone telepathy are not paranormal but normal part of our biological nature. Draws on more than 5 000 case histories, 4 000 questionnaire responses and the results of experiments carried out with more than 20 000 people. Reveals that our minds and intentions extend beyond our brains into the world around us and even into the future. Nearly everyone has experienced the feeling of being watched or had their stare result in a glance in their direction. The phenomenon has been cited throughout history in nearly every culture along with other commonplace paranormal occurrences such as premonitions and telepathy. In this newly updated edition, Sheldrake shares his more than 25 years of research into telepathy, the power of staring, remote viewing, precognition and animal premonitions. Drawing on more than 5 000 case histories, 4 000 questionnaire responses and the results of experiments on staring, thought transference, phone telepathy and other phenomena carried out with more than 20 000 people as well as reports and data from dozens of independent research teams, Sheldrake shows that these unexplained human abilities such as the sense of being stared at are not paranormal but normal part of our biological nature. He reveals that telepathy depends on social bonds and traces its evolution from the connections between members of animal groups such as flocks, schools and packs. Sheldrake shows that our minds and intentions extend beyond our brains into our surroundings with invisible connections that link us to each other, to the world around us and even to the future.

Disappearing Object Phenomenon Tony Jinks, 2016-10-14 Have you ever had your car keys or television remote control inexplicably vanish from under your nose only to reappear months later in another part of the house for no evident reason? Most would dismiss it as absent-mindedness with perhaps a joking remark about paranormal activity. Yet remarkable circumstances surrounding many such accounts suggest that the mysterious disappearance of objects could be more than just one of those things. Examining a large selection of fascinating narratives, this book reviews the disappearing object phenomenon (DOP) from a scientific standpoint. Both skeptical and supportive perspectives on DOP are considered, leading to the conclusion that disappearing, appearing and reappearing objects are indicators of a controversial take on the nature of reality.
