The Peacekeepers An Assessment Of Peach Keeping Operations At The Arab Israel Interface:

Reinventing Peacekeeping in Africa F. Olonisakin, 2021-07-26 The euphoric cries of a peaceful and more dynamic new world order which followed the end of the Cold War have been silenced by the increased intensity of local conflicts around the world The humanitarian crises resulting from these conflicts have attracted greater international attention Perhaps even more tragic is the failure of the international community to find early effective response to these conflicts which have profound security implications for the affected regions and have led to the collapse of state structures in some cases The intra state conflicts in Africa alone have claimed over one million lives since 1990 On the international scene these internal conflicts have created new challenges for the UN whose efforts at dealing with them have produced mixed results whilst international policy makers the military and academics are faced with difficult questions Can traditional peacekeeping be stretched to accommodate this class of conflict What is the legal basis for these operations Attempts to answer these questions at the conceptual level have led to the development of concepts such as second generation peacekeeping wider peacekeeping peace support operations and strategic peacekeeping It has emerged that there is no common view on an effective and realistic set of tools to manage these crises Perhaps the most significant point to arise from the differing conceptual views presently is that an effective approach and sound legal basis have not been found for dealing with recalcitrant internal conflicts in far away regions which are not high on the strategic considerations of the great powers This book reconsiders the role of the UN and regional organisations such as ECOWAS in Africa It examines the response to the civil war in Liberia which served as a precursor to the international response to the crisis in Sierra Leone On the one hand this book offers an analysis of a new conceptual framework for managing a specific class of violent conflict On the other hand it provides first hand account of the character of a force that attempted to apply this approach In drawing some of its conclusions the book relies on the testimonies of many of the soldiers who formed the core of the military operations in these difficult conflict areas in West Africa

Peace Operations Between War and Peace Erwin A. Schmidl, 2013-11-05 Peace operations entail a special form of co operation between nation states and international organization but tend to be most difficult for the soldiers police and civilian officials on the ground This volume highlights the latter role with case studies of Srebrenica and Somalia

In the Line of Fire - Peacekeeping in the Golan Heights Major Jeffery S. Bess, 2015-11-06 This monograph examines the considerations involved in maintaining a peacekeeping force in the Golan Heights The examination is based on the assumption that Israel and Syria have reached an agreement concerning the Golan Heights and that the United States is going to establish a peacekeeping force in the Golan Heights The monograph first examines the historical background of the area since the 1967 War Based on this examination and on lessons learned from previous UN and other multinational peacekeeping operations the monograph addresses national composition of the force command of the peacekeeping force and force structure Next based on the military and political aspects of the region the monograph

addresses the future peacekeeping force commander's concerns with military credibility, freedom of movement and force protection. The study concludes with a summary evaluation of the necessary size and type of force for future peacekeeping in the Golan Heights. Based on the assumption and an analysis of the political and military considerations, future peacekeeping operations in the Golan Heights would require a MFO type force under the command and control of the United States. Due to the essential requirement for force protection due to the potential of pre-emption by either Israel or Syria and of terrorist attacks, a heavy brigade would be the most effective force in maintaining the peace while protecting the force.

International Peacekeeping Paul F. Diehl, 1993-07-01 In *International Peacekeeping* Paul Diehl examines the recent record of United Nations peacekeeping forces and develops criteria for assessing their operations. His analysis provides useful guidance for the management of new hostilities in areas such as Central and Eastern Europe where the dissolution of the Soviet Union has spawned bitter civil wars and dangerous border disputes. The paperback edition includes a new epilogue in which Diehl examines peacekeeping operations in Bosnia, Somalia and Cambodia.

The Origins of the Arab Israeli Wars Ritchie Ovendale, 2015-10-23 This highly regarded history gives a balanced and judicious introduction to this immensely complex and controversial subject, weaving different strands of the story into a single coherent narrative, thus making it essential reading for all students studying conflict in the Middle East. Of all the troubles affecting the modern world, few are as topical, deep-rooted and intractable as the Arab-Israeli conflict. For this region, an understanding of the past is vital to an understanding of the present. Ritchie Ovendale's classic study of the roots of the conflict is now updated for a fourth time and considers events until 2003.

National Contingents in United Nations Peace-Keeping Forces Robert C R Siekmann, 1991-09 Are member states obliged to provide troops for United Nations peace-keeping operations? What criteria apply for the composition of UN forces? Does the host state have any say in this respect? And may national contingents be withdrawn at any time? Who pays the cost of participation? How are criminal trials of military personnel organized and what is their status? What influence do troop-contributing states have in the operational phase with regard to their own contingent and their members? This book sets out to answer these and many other relevant questions, examining operational practice in detail and assessing the results according to international law criteria. With the growing role of UN peace-keeping forces, Siekmann has produced an essential handbook for diplomats, legal advisers and the military.

PEACEKEEPING, PEACEMAKING, & WORLD ORDER Alexander Mirza, 2024-01-08 The book provides a comprehensive analysis of the UN's role in peacekeeping and peacemaking in the post-Cold War era. The author evaluates the strength and shortcomings of multilateralism, its evolution, challenges and failures. The author sees a role in peacemaking operations through UN multilateralism to address self-determination movements and solve the debate between humanitarian intervention and national sovereignty.

Peacekeeping in the Middle East as an International Regime Kenneth Dombroski, 2007-11-21 This book investigates whether an international institution can alter state behaviour and thereby contribute to the peaceful

resolution of a conflict Kenneth Dombroski focuses on the series of interrelated peacekeeping efforts undertaken to help resolve the Arab Israeli conflict from 1948 1994 Analyzing these sequential operations over a forty six year period provides evidence as to the relative importance of institutions in a state centric international system He provides an alternative approach to the study of international peacekeeping that evaluates the long term effects of peacekeeping on state behaviour and concomitantly the effects of varying state behaviour on an international regime This book offers new perspectives on the relative importance of regimes the utility of regime analysis in explaining the importance of international institutions the significance of a peacekeeping regime s role in influencing state behaviour and the impact of varying state behaviour on regime evolution *Peacemaking, Peacekeeping and Coalition Warfare* Fariborz L. Mokhtari, 1994 [A Changing United Nations](#) W. Knight, 2000-10-19 The United Nations is at a critical juncture It is faced with two distinct choices to remain a decision frozen in time or to develop a long term adaptation agenda and strategy that would allow it to be a relevant institution of global governance for the twenty first century Reform and reflexive institutional adjustments have failed to address underlying problems facing this organization After fifty five years of existence it is still considered an inefficient and ineffective world body Worse yet its relevance is being questioned This study offers a critique of existing UN change processes and then shifts focus to considerations of institutional learning strategies that would allow the UN to maintain relevance amidst the evolution of global governance arrangements
