The Pelican Book of the Middle Ages Morris Bishop, 1971

Pelican Book of the Middle Ages Morris Bishop, 1968

The Later Middle Ages, 1272-1485 George Holmes, 1966 Professor Holmes also examines the politics of these years the relations of the kings of England with neighboring rules and with their own subjects This period includes the successful conquest of Scotland the series of wars with France known as the Hundred Years War and the War of the Roses which brought Henry VII the first Tudor to the throne in 1485 Here also is an exploration of the heretical movement initiated by Wycliffe in the thirteen seventies which began a tendency toward loosening the power of the Church and a study of the beginnings of parliamentary government in the later fourteenth century its collapse in the following century and the emergence of a strong self sufficient monarchy English life in the thirteenth century was characterized by a single Christian Church owing allegiance to Rome and living on the revenues of its estates kingship with difficulty kept intact in the face of scheming magnates jealous of their privileges a countryside divided into thousands of small estates tilled by peasants some of them serfs and owned by lords with considerable power over their tenants armies of knights fighting on horseback Gothic cathedrals monasteries castles town gilds Professor Holmes describes this medieval society and its evolution after the Black Death into a somewhat different kind of society in the late fifteenth century He argues that the population decrease as a result of the plague beginning in 1349 brought about fundamental transformations village life changed serfdom disappeared the great estates became less important industry grew and the commodities and directions of trade changed *The Pelican History of art*, 1954 **The Pelican History of art**, 1955 Images and Ideas in the Middle Ages Gerhart Burian Ladner, 1983 The Epistemology of the Monstrous in the Middle Ages Lisa Verner, 2005-01-07 This book studies the phenomena of monsters and marvels from the time of Pliny the Elder through the 14th century The Origins of the Western Legal Tradition Ellen Goodman, 1995 Ellen Goodman uses extensive extracts from original writings to highlight the main themes of the Western legal tradition The strength of the book is its clear focus on the heart of the tradition constitutionalism representative institutions and rule by law Goodman links Christianity to its origins in Greek philosophy and Judaism She delves into the position of the Roman Church as the tenuous Dark Ages conduit Feudalism lives and dies and the common law and parliament emerge The author accurately and vividly charts the main currents avoiding both the shoals and the myriad tributaries and so enables readers to have a clearer and deeper understanding of our present legal system **The Later Middle Ages** Stephen Medcalf, Nicola Coldstream, Marjorie Reeves, David R Starkey, 2019-07-10 Originally published in 1981 *The Later Middle Ages* bridges the gap between modern and medieval language and literature by introducing the social and intellectual milieu in which writers like Chaucer Malory and Margery Kempe lived It provides a unified and coherent account of the culture of late medieval England and of the problems involved in viewing it in relation to English literature The book covers the history of ideas and education art and architecture and changes in the social economic

and political structure **God and Reason in the Middle Ages** Edward Grant, 2001-07-30 Between 1100 and 1600 the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization Of crucial significance was the invention of the university around 1200 within which reason was institutionalized and where it became a deeply embedded permanent feature of Western thought and culture It is therefore appropriate to speak of an Age of Reason in the Middle Ages and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century The object of this study is twofold to describe how reason was manifested in the curriculum of medieval universities especially in the subjects of logic natural philosophy and theology and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition barbarism and unreason
