The Citizen And Politics A Comparative Perspective:

The Citizen and Politics Sidney Verba, Lucian W. Pye, 1978 **Environmental Protest and Citizen Politics in Japan** Margaret McKean, 2023-11-15

Environmental Protest and Citizen Politics in Japan examines the development and significance of citizens movements in Japan particularly those centered around environmental activism from the early 1970s. The author initially set out to study political behavior and participation believing that citizens movements were similar to other protest groups but the research led to surprising discoveries. Contrary to initial expectations these movements proved to be a unique blend of protest and community organization defying conventional political structures and assumptions. The book focuses on the political social and environmental changes that these movements initiated highlighting their role in fostering political participation and social transformation. By conducting surveys in 1972 the author captures the emergence of these movements at their most vibrant when they were not yet institutionalized or following established trends. Although the movements were largely successful in their immediate goals their broader influence on Japan's political landscape especially regarding electoral change and the nature of political conflict remains more modest. The book reflects on the evolution of these movements their impact on political processes and the role of social movements in shaping democratic values while also analyzing the gaps between their goals and their practical achievements. It ultimately presents a nuanced understanding of Japanese citizens movements and their political implications. Handbook of Education for Citizenship and Democracy James Arthur, Ian Davies, Carole Hahn, 2008-07-01. This handbook brings together new work by some of the leading authorities on citizenship education and is divided into five sections. The first section deals with key ideas about citizenship education including democracy rights globalization and equity. Section two contains a wide range of national case studies of citizenship education including African Asian Australian European and North and South American examples. The third section focuses on perspectives about citizenship education with discussions about key areas such as sustainable development anti racism gender. Section four provides insights into different characterisations of citizenship education with illustrations of democratic schools peace and conflict education global education human rights education etc. The final section provides a series of chapters on the pedagogy of citizenship education with discussions about curriculum teaching learning and assessment Global Citizenship Education , 2008-01-01. The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities. As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates

unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society

Troubling the Canon of Citizenship Education George H. Richardson, David W.
