[The Future of Animal Farming](#) Marian Stamp Dawkins, Roland Bonney, 2011-09-20 Does animal welfare have a place in sustainable farming or do the demands of a rising human population and the threat of climate change mean that the interests of animals must be put aside Can we improve the way we keep animals and still feed the world or is it a choice between ethics and economics The aim of this book is to challenge the them and us thinking that sets the interests of humans and farm animals against each other and to show that to be really sustainable farming needs to include not ignore animal welfare The authors of this remarkable book come from a diversity of backgrounds industry animal welfare organizations academic institutions and practical farming They are united in arguing that farm animals matter and that sustainable farming must have animal welfare at its ethical core along with the production of healthy affordable food and care for the environment

States and Canada during the twentieth century *New Directions for Agriculture and Agricultural Research* Kenneth A. Dahlberg, 1986 Ethical and value issues The global setting resource environmental and socio economic trends The national setting past and present goals and priorities Assessing neglected dimensions Evaluative concepts in agricultural research Emerging alternatives and their implications Where do we go from here **The Wrath of Capital** Adrian Parr, 2014-09-02 Although climate change has become the dominant concern of the twenty first century global powers refuse to implement the changes necessary to reverse these trends Instead they have neoliberalized nature and climate change politics and discourse and there are indications of a more virulent strain of capital accumulation on the horizon Adrian Parr calls attention to the problematic socioeconomic conditions of neoliberal capitalism underpinning the world's environmental challenges and she argues that until we grasp the implications of neoliberalism's interference in climate change talks and policy humanity is on track to an irreversible crisis Parr not only exposes the global failure to produce equitable political options for environmental regulation but she also breaks down the dominant political paradigms hindering the discovery of viable alternatives She highlights the neoliberalization of nature in the development of green technologies land use dietary habits reproductive practices consumption patterns design strategies and media She dismisses the notion that the free market can solve debilitating environmental degradation and climate change as nothing more than a political ghost emptied of its collective aspirations Decrying what she perceives as a failure of the human imagination and an impoverishment of political institutions Parr ruminates on the nature of change and existence in the absence of a future The sustainability movement she contends must engage more aggressively with the logic and cultural manifestations of consumer economics to take hold of a more transformative politics If the economically powerful continue to monopolize the meaning of environmental change she warns new and more promising collective solutions will fail to take root **Perceptions of Human-Animal Relationships and their Impacts on Animal Ethics, Law and Research** Cédric Sueur, Marie Pelé, Tetsuro Matsuzawa, Jean-Yves Georges, 2021-02-09 **The English Pig Industry** Great Britain. Parliament. House of Commons. Environment, Food and Rural Affairs Committee, 2009 This report finds that although the pig industry is highly competitive and is well known for being cyclical the last ten years have seen a steady decline in the scale and productivity of the English pig industry and an increase in the pig meat imported into the UK to satisfy consumer demand The lack of transparency in the supply chain leads farmers to form the view that they are not getting their fair share UK pigs cost more to produce than their EU counterparts The industry blames this on the effects of disease outbreaks high feed prices burdensome environmental regulations and the high cost of the introduction of new welfare standards of housing for pigs in 1999 Pig producers are rightly proud of their high welfare standards but the Committee believes that they have not successfully promoted to the consumer the justification for the higher cost of English pig meat Retailers and catering suppliers are responsible for ensuring that labelling of pig meat products is clear and unambiguous but producers animal welfare groups such as the RSPCA and Government have a role in

making certain that consumers understand the difference between the standards of welfare in the various methods of pig production and ensuring that pig meat produced in the UK is of a high welfare standard Defra must continue to advise other Government departments and public bodies on the welfare standards of farm assurance schemes in order to encourage them to adopt a more innovative approach in public sector procurement of pig meat liaise closely with the industry on its Health and Welfare Council fund research into the pig specific diseases which have severely impacted on the industry in recent years
