Reading and Questions

Panama Canal

Background to the Canal
The United States became involved with the Panama Canal in the early 1880s. The French had attempted to build a canal through Central America, but the project failed. The United States then stepped in to complete the canal, which was a major achievement for the country.

Why Build a Canal?
The Panama Canal is a man-made waterway that connects the Atlantic and Pacific Oceans. It is one of the most important waterways in the world, allowing ships to travel between the two oceans without having to go around South America. The canal is 82 kilometers long and has a maximum depth of 16 meters.

Constructing the Canal
Constructing the canal was a massive task that took 10 years to complete. The French had started the project in 1881, but it was abandoned in 1889. The United States then took over the project in 1904 and completed it in 1914. The canal was built through some of the most difficult terrain in the world, and it cost the lives of thousands of workers.

Significance of the Canal
The Panama Canal is a vital link between the Atlantic and Pacific Oceans. It allows ships to travel between the two oceans in a matter of days, instead of weeks. The canal is also a major source of revenue for Panama, and it has played a key role in the country's development.

Subcommittee on Panama Canal, 1978 **Difficult Questions Have Easy Answers** Atina Hseham, 2023-12-06 An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o'clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead to confusion due to the confusion generated question These types of questions are very specific to the areas in which people's knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations Panama Canal Treaty Ramifications: Appendices A through J.
