Control Project,1979 **The Breast Cancer Wars** Barron H. Lerner,2001-05-31 In this riveting narrative Barron H Lerner offers a superb medical and cultural history of our century long battle with breast cancer Revisiting the past Lerner argues can illuminate and clarify the dilemmas confronted by women with and at risk for the disease Writing with insight and compassion Lerner tells a compelling story of influential surgeons anxious patients and committed activists There are colorful portraits of the leading figures ranging from the acerbic Dr William Halsted who pioneered the disfiguring radical mastectomy at the turn of the century to George Crile Jr the Cleveland surgeon who shocked the medical establishment by going public with his doubts about mastectomy to Rose Kushner a brash journalist who relentlessly educated American women about breast cancer Lerner offers a fascinating account of the breast cancer wars the insistent efforts of physicians to vanquish the enemy the fights waged by feminists and maverick doctors to combat a paternalistic legacy that discouraged decision making by patients and the struggles of statisticians and researchers to generate definitive data in the face of the great risks and uncertainties raised by the disease As easy as it is to demonize male physicians the persistence of the radical mastectomy and other invasive treatments has had as much to do with the complicated scientific understandings of breast cancer as with sexism In Lerner s hands the fight against breast cancer opens a window on American medical practice over the last century the pursuit of dramatic cures with sophisticated technologies the emergence of patients rights the ethical and legal challenges raised by informed consent and the limited ability of scientific knowledge to provide quick solutions for serious illnesses A searching and profound work on an emotionally charged issue **The Breast Cancer Wars** tells a story that remains of vital importance to modern breast cancer patients their families and the clinicians who strive to treat and prevent this dreaded disease **The Truth in Small Doses** Clifton Leaf,2014-08-05 A decade ago Leaf a cancer survivor himself began to investigate why we had made such limited progress fighting this terrifying disease The result is a gripping narrative that reveals why the public s immense investment in research has been badly misspent why scientists seldom collaborate and share their data why new drugs are so expensive yet routinely fail and why our best hope for progress brilliant young scientists are now abandoning the search for a cure
