Green,2024-01-25 Collective self defence can be defined as the use of military force by one or more states to aid another state that is an innocent victim of armed attack However it is a legal justification that is open to abuse and its exercise risks escalating conflict Recent years have seen an unprecedented increase in the number of collective self defence claims It has been the main basis for US led action in Syria 2014 and was advanced by Russia in relation to its full scale invasion of Ukraine 2022 Yet there still has been little analysis of collective self defence in international law This book crucially progresses the debate on various fundamental and under explored questions about the conceptual nature of collective self defence and the requirements for its operation Green provides the most detailed and extensive account of collective self defence to date at a time when it is being invoked more than ever before **CIS Index to Publications of the United States Congress** Congressional Information
