✓ Exclusively available on IvyPanda

The City after the Automobile: An Architect’s Vision by an outstanding modern architect Moshe Safdie published in 1997 is something to savour. The book concentrates on Safdie’s vision of ideal cities based on the conventional practices of city planning and the revolutionary techniques of combining cities and suburbs, aimed at boosting mobility, flexibility and convenience. Moreover the book dwells on the socio-economic and political aspects focusing on the factors that facilitate living and working in the city.

The book is divided into three parts each focusing on a definite aspect. In part one, the author concentrates on his vision of the city. After the World War the automobile industry developed at a rapid pace forming a new concept of the cities. The cars have been playing a crucial role in people’s lives affecting urban landscape with its constant need for parking and new traffic lines creating a lot of problems for citizens and architects. Therefore, Safdie suggests the reducing of individually-owned cars and the implementation of publicly-owned electric automobiles that would be kept in one place, a depot, and rented to people. This approach is highly beneficial as it saves plenty of parking place in the cities.

In addition, Safdie is an ardent defender of eco-friendly automobiles, so in the author’s point of view, new transport system would be twice beneficial. Moreover, Safdie states that abandoning the suburban shopping malls and building new linear centers that would serve as a public arena would facilitate the mobility of the cities. This idea might seem far from realistic however all innovations are initially taken with suspicion, as a rule. Furthermore, the author makes some suggestions of combining the idea of public space and privacy creating thus more citizen-friendly environment. According to Safdie, the city after the automobile should present a broad network of interconnected and interrelated elements aimed at combining nature and street life, economy and residential opportunities, and “a multitude of services and entertainment” (Safdie 1997, 151).
