The Climbing Tree:

The Climbing Tree John Stith, 2019-11-12 The Climbing Tree is an eloquent poetic fable with a timeless message about growing up sibling rivalry and the love between brothers Little Brother wants to follow Big Brother up the branches of the Climbing Tree but Mom tells him he has to wait until he's older When he's finally big enough to go up Little Brother makes a difficult discovery no matter how high he climbs Big Brother will always be a branch ahead In their make-believe world within the tree the brothers grow and transform into majestic birds mountains and even celestial bodies yet Little Brother still can't help but feel less when compared to Big Brother Will the two ever be able to share the same space *The Climbing Tree* Barbara Leary, 2019-10 A story about noticing the natural world around us finding our place in it and sharing it with others Its themes are persistence imagination inclusion and friendship 24 color illustrations The Climbing Tree Kelly Kovacs, 2012-06-01 The Climbing Tree is an inspirational story sure to delight one's heart at any age It explores the idea of choice with the tree representing the branched pathway of decisions an individual makes throughout a lifetime The Climbing Tree guides the reader to look inward deep into one's own heart where every personal journey begins Be sure to visit www.TheClimbingTreeBook.com **The Climbing Tree** Erin Mary McLain, 2020-02-28 **The Climbing Tree** Carol McAfee, 1989 The Climbing Tree Dolores Richardson, 2012-07 A resilient girl in Georgia grows to be a promising young adult despite a series of painful obstacles throughout her life The Life Space of the Urban Child Gunter Mey, 2017-09-08 The heart of this book is the translation of The Life Space of the Urban Child written in 1935 by Martha and Hans Heinrich Muchow Life Space provides a fresh look at children as actors and how they absorb their city environments It uses an empirical base connected with theories about the worlds in which children live The first section provides historical background on Muchow's study and the author The second section presents the translation of the Life Space study as well as comments from an environmental psychologist's perspective The third section reviews the study's theoretical foundations including the concept of critical personalism the perspectives of phenomenology and the notion of Umwelt environment The last section addresses various lines of research developed from the Life Space study including Muchow's work in describing children in urban environments methodological approaches and the significance of space in social science and educational contexts The manner in which Martha Muchow conducted her studies is itself of note She obtained access to the children in their environments and combined observation with cartographies and essays produced by the children This approach was new at the time and continues to inspire researchers today This volume is the latest work in Transaction's History and Theory of Psychology series **Take to the Trees** Marguerite Holloway, 2025-05-13 One of Heatmap's Climate Books to Read in 2025 An empowering journey into the overstory with the arborists and forest experts safeguarding our iconic trees Journalist Marguerite Holloway arrives at the Women's Tree Climbing Workshop as a climbing novice but with a passion for trees and a deep concern about their future Run by twin sister tree doctors Bear LeVangie and Melissa LeVangie Ingersoll the workshop

helps people from everyday tree lovers to women arborists working in a largely male industry develop impressive technical skills and ascend into the canopy As Holloway tackles unfamiliar equipment and dizzying heights she learns about the science of trees and tells the stories of charismatic species including hemlock aspen Atlantic white cedar oak and beech She spotlights experts who are chronicling the great dying that is underway in forests around the world as trees face simultaneous and accelerating threats from drought heat floods disease and other disruptions As she climbs Holloway also comes to understand the profound significance of trees in her relationship with her late mother and brother The book's rousing final chapter offers something new a grander environmental and arboreal optimism in which the story of trees and their resilience meshes with that of people working to steward the forests of the future and of community found among fellow tree climbers A lyrical work of memoir and reportage Take to the Trees sounds the alarm about rapid arboreal decline while also offering hope about how we might care for our forests and ourselves Legacy of Love Sherry Bryant,2022-12-27

Legacy of Love I leave this Legacy of Love As a remembrance from someone Who dearly cared nurtured and loved you As best she knew how As you read these words Written from my heart Inspired by God Through His amazing grace and merciful love May you too be showered With His blessings as I was Through the outpouring of His holy spirit On this my Legacy of Love **The Wild Trees** Richard Preston,2008-02-12 Hidden away in foggy uncharted rain forest valleys in Northern California are the largest and tallest organisms the world has ever sustained the coast redwood trees *Sequoia sempervirens* Ninety six percent of the ancient redwood forests have been destroyed by logging but the untouched fragments that remain are among the great wonders of nature The biggest redwoods have trunks up to thirty feet wide and can rise more than thirty five stories above the ground forming cathedral like structures in the air Until recently redwoods were thought to be virtually impossible to ascend and the canopy at the tops of these majestic trees was undiscovered In *The Wild Trees* Richard Preston unfolds the spellbinding story of Steve Sillett Marie Antoine and the tiny group of daring botanists and amateur naturalists that found a lost world above California a world that is dangerous hauntingly beautiful and unexplored The canopy voyagers are young just college students when they start their quest and they share a passion for these trees persevering in spite of sometimes crushing personal obstacles and failings They take big risks they ignore common wisdom such as the notion that there's nothing left to discover in North America and they even make love in hammocks stretched between branches three hundred feet in the air The deep redwood canopy is a vertical Eden filled with mosses lichens spotted salamanders hanging gardens of ferns and thickets of huckleberry bushes all growing out of massive trunk systems that have fused and formed flying buttresses sometimes carved into blackened chambers hollowed out by fire called fire caves Thick layers of soil sitting on limbs harbor animal and plant life that is unknown to science Humans move through the deep canopy suspended on ropes far out of sight of the ground knowing that the price of a small mistake can be a plunge to one's death Preston's account of this amazing world by turns terrifying moving and fascinating is an adventure story told in novelistic detail by a master of

nonfiction narrative The author shares his protagonists passion for tall trees and he mastered the techniques of tall tree climbing to tell the story in *The Wild Trees* the story of the fate of the world s most splendid forests and of the imperiled biosphere itself
