The studied media have changed from permeable porous and fractured ones to much less permeable ones such as clay and shale. The studied pore sizes have also changed from millimetres to micro meters or even nano meters. The objective of this Special Issue is to report recent advances in groundwater flow and solute transport that push the knowledge boundary into new territories which include but are not limited to flow and transport in sloping aquifer hillslopes coupled unsaturated and saturated flow coupled aquifer vertical horizontal slant well flow interaction of aquifer with connected and disconnected rivers non Darcian flow anomalous transport beyond the Fickian scheme and flow and transport in extremely small pore spaces such as shale and tight sandstones. Contributions focusing on innovative experimental numerical and analytical methods for understanding unconventional problems such as the above listed ones are encouraged and contributions addressing flow and transport at interfaces of different media and crossing multiple temporal and spatial scales are of great value.

Hierarchies in World Politics Ayşe Zarakol, 2017-09-07 Globalizing processes are gathering increased attention for complicating the nature of political boundaries authority and sovereignty. Recent examples of global financial and political turmoil have also created a sense of unease about the durability of the modern international order and the ability of our existing theoretical frameworks to explain system dynamics. In light of the inadequacies of traditional international relation IR theories in explaining the contemporary global context a growing range of scholars have been seeking to make sense of world politics through an analytical focus on hierarchies instead. Until now the explanatory potential of such research agendas and their implications for the discipline went unrecognized partly due to the fragmented nature of the IR field. To address this gap this ground breaking book brings leading IR scholars together in a conversation on hierarchy and thus moves the discipline in a direction better equipped to deal with the challenges of the twenty first century.
