The Path Of The Buddha Buddhism Interpreted By Buddhists:

The Path of the Buddha Kenneth W. Morgan, 1986-01-01 This book presents Buddhism from the Buddhist point of view. It is an earnest attempt of eleven devout Buddhist scholars to describe the beliefs and practices of the Buddhist world twenty-five centuries after the Buddha. The need for such a book grew out of conversations among fellows of the National Council of UAS on Religion in Higher Education. It was agreed that a fuller understanding of the leading non-Christian religions requires books written by men speaking from the point of view of their own faiths and edited by a Westerner to make the meaning clear to readers brought up in the Greek Hebrew Christian Tradition. Bhikhu J. Kashyap of India has contributed the first chapter on the origin and expansion of Buddhism. U. Thittila of Rangoon wrote the second chapter on the fundamental principles of the Theravada Buddhism. Balangoda Ananda Maitreya of Ceylon, who wrote the third chapter, was recommended as a man who can speak for all Theravada countries.

Universality of Buddha Shiv Sharma, 2002 **The Geography of Religion** Roger W. Stump, 2008-04-04 The only book of its kind this balanced and accessibly written text explores the geographical study of religion Roger W Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space He begins by analyzing the factors that have shaped the spatial distributions of religious groups including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs The author then assesses how major religions have diversified as they have become established in disparate places producing a variety of religious systems from a common tradition Stump explores the efforts of religious groups to control secular space at various scales relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities Examining sacred space as a diverse but recurring theme in religious belief the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups Refreshingly jargon free and impartial this text provides a broad comparative view of religion as a focus of geographical inquiry
