The Penny Capitalists A Study Of Nineteenth Century Working Class Entrepreneurs:

The Penny Capitalists John Benson, 1983 This work examines the virtually ignored subject of working class entrepreneurial activity during the 19th and early 20th centuries By using a wide variety of oral and other evidence the author shows that far from being destroyed by urban industrial development penny capitalism remained a widespread and vital part of working day life He shows that the survival of penny capitalism has major implications for the understanding of some of the most important issues under discussion in labour and social history **The Working Class in England**

1875-1914 John Benson, 2016-07-01 First published in 1985 Too often aspects of working class life have been treated as distinct and separate The contributors to this volume are aware of the dangers of such atomisation and have attempted to bring together a collection of studies which add to our knowledge of life in that time The examinations of family health work leisure and criminal trends form the basis of this work and suggest that the everyday lives and values of the working class were even more varied creative and complex than is generally believed This title will be of interest to students of history

The Working Class in Britain John Benson, 2003-08-22 Who made up the working class in Britain who were the ordinary men and women and what were their aspirations The first generation of postwar British labour historians tended to be preoccupied with working class activism This text attempts to chart not only this struggle but to describe and analyse the rich and varied tapestry of working class history as a whole It demonstrates that class both existed and mattered although ordinary men and women had diverse lives and lifestyles Professor Benson examines work wages incomes and the cost of living family kinship and community relations and the individual in the context of nation and class **The Lancashire**

Working Classes c.1880-1930 Trevor Griffiths, 2001-10-04 This book examines the experiences and values which shaped working class life in Britain in the half century from 1880 It takes as its focus a region Lancashire which was central to the social and political changes of the period The discussion centres on two towns Bolton and Wigan which while they were geographically close differed significantly in their industrial fortunes and their electoral development The formation of class identity is traced through developments in the world of work from the impact of technological and managerial innovations to the elaboration of collective bargaining procedures Beyond work particular attention is paid to the dynamics of neighbourhood and family life the latter emerging as an important source of continuity in working class life The broader impact of such influences are traced through a close examination of the electoral politics of the period Dr Griffiths conclusions fundamentally challenge the notion that the fifty years around the turn of the century witnessed the emergence of a working class more culturally and politically united than at any other time either before or since Rather an alternative narrative of class development is offered in which broad continuities in working class life in particular the survival of religious ethnic and occupational points of division are emphasised Despite the presence of strong and stable labour institutions from trade unions to Co operative and Friendly Societies the picture emerges of a working class more

individualist than collectivist in outlook more flexible in response to economic change and less constrained by the broader solidarities of work and neighbourhood than has previously been supposed

State, Society and the Poor in Nineteenth-Century England

Alan Kidd, 1999-07-08 Today it is impossible to separate discussion of poverty from the priorities of state welfare A hundred years ago most working class households avoided or coped with poverty without recourse to the state The Poor Law after 1834 offered little more than a safety net for the poorest and much welfare was organised through charitable societies self help institutions and mutual aid networks Rather than look for the origins of modern provision the author casts a searching light on the practices ideology and outcomes of nineteenth century welfare This original and stimulating study based upon a wealth of scholarship is essential reading for all students of poverty and welfare It also contains much to interest a wider readership

Entrepreneurship in the Balkans

Veland Ramadani, Robert C. Schneider, 2013-05-13 This book represents a comprehensive state of the art picture of entrepreneurship and small business management issues in the Balkans region It provides major theoretical and empirical evidence that offers a brighter view of these fields and aims to open up opportunities for greater dialogue in public policy The readers would be able to enhance their knowledge on small businesses and innovation issues in the Balkans An outcome of a long lasting endeavour this book includes contributions of highly reputed authors and experts from the Balkans countries Features forewords by two well known personalities of this field Leo Paul Dana and Alain Fayolle

Artisan Entrepreneurs in Cairo and Early-Modern Capitalism (1600-1800)

Nelly Hanna, 2011-06-16 Little has been written about the economic history of Egypt prior to its incorporation into the European capitalist economy While historians have mined archives and court documents to create a picture of the commercial activities networks and infrastructure of merchants during this time few have documented a similar picture of the artisans and craftspeople Artisans outnumbered merchants and their economic weight was considerable yet details about their lives the way they carried out their work and their role or position in the economy are largely unknown Hanna seeks to redress this gap with Artisan Entrepreneurs in Cairo and Early Modern Capitalism 1600 1800 by locating and exploring the role of artisans in the historical process Offering richly detailed portraits as well as an overview of the Ottoman Empire s economic landscape Hanna incorporates artisans into the historical development of the period portraying them in the context of their work their families and their social relations These artisans developed a variety of capitalist practices both as individuals and collectively in their guilds Responding to the demands of expanding commercial environments in Egypt and Europe artisans found ways to adapt both production techniques and the organization of production Hanna details the ways in which artisans defied the constraints of the guilds and actively engaged in the markets of Europe demonstrating how Egyptian artisan production was able to compete and survive in a landscape of growing European trade Deftly synthesizing a wide range of economic and historical theory Hanna reinvigorates the current scholarship on early Ottoman history and provides a persuasive challenge to the largely shallow perception of artisans role in

Egypt's economy **A Treatise on Social Theory** Walter Garrison Runciman, 1997-08-28 In this concluding volume of his trilogy on social theory W G Runciman applies to the case of twentieth century English society the methodology distinguishing reportage explanation description and evaluation and theory of the preceding two volumes Volume III shows how England's capitalist mode of production liberal mode of persuasion and democratic mode of coercion evolved in the aftermath of the First World War from what they had been since the 1880s but then did not in turn evolve significantly following the Second World War The explanation rests on an analysis of the selective pressures favouring some economic ideological and political practices over others in an increasingly complex environment neither predictable nor controllable by policy makers This is supported by a graphic account of the changes themselves and how they were experienced by different segments of English society *Bread and Work* Matt Perry, 2000-01-20 Between the world wars unemployment spread throughout the industrialised world like a disease In *Bread and Work* Matt Perry places this global unemployment crisis in its proper international context Focusing on Britain Europe and the United States he compares and contrasts popular attitudes and the government response toward unemployment Looking beyond statistics and economic cycles Perry investigates the human impact of unemployment He uncovers the experience of being jobless from the perspective of those who lived through it their employers and their communities He uses oral history memoirs literary accounts and newspaper articles to reveal the reality of unemployment Perry argues that the scale of the crisis has been minimised by historians who have tended to emphasise that prolonged unemployment was the problem of the distressed fringe Finally Perry argues that the lessons of the 1930s have direct relevance today since the structural problems of industrial capitalism remain inherent **Using Computers in History** M.J. Lewis, Roger Lloyd-Jones, 2005-11-23 *Using Computers in History* is designed to introduce students to historical computing through practical workshop exercises With topics such as the pattern of nineteenth century emigration from the UK the performance of the American and German economies in the 1930s and the Lancashire cotton industry Lloyd Jones and Lewis explain and illustrate the possible uses of the computer for the historian *Using Computers in History* raises awareness of the use of computers as an important tool for the historian provides a practical introduction to basic computer terminology includes high quality diagrams of the screen displays which should appear at each stage examines the use of spreadsheets and how to design and work with them discusses the different software packages available concentrating on Microsoft Excel 4 includes spreadsheet exercises based around a range of historical data sets explores the use of databases shows how to construct them gives guidelines for further study prompts students to apply the skills they have learnt to a number of examples
