The Hawaiian Goose An Experiment In Conservation:

The Hawaiian Goose Janet Kear,A.J Berger,2010-09-30 Dr Janet Kear Assistant Director of the Wildfowl Trust and Curator of its Martin Mere Reserve and Professor Andrew Berger of the University of Hawaii have written a timely and absorbing account of the recent history of the Hawaiian Goose or Nene its descent to near extinction its eleventh hour rescue and current restoration to the wild The species declined from an estimated population of 25 000 in Hawaii in the 18th century to less than fifty birds in the 1940s Today thanks largely to the extended breeding programmes at Slimbridge and Pohakuloa there are probably more than 2000 Hawaiian Geese in the world The achievement is justly applauded and well known but whether this impressive experiment in conservation has been truly successful will not be clear until it becomes evident that the released birds can maintain a breeding population in the wild As the authors explain the outcome is far from predictable The causes which led to the species decline and the hazards and difficulties faced by the reintroduced population are discussed at length but the core of the book is the propagation programmes at Slimbridge and Pohakuloa and the problems and successes they brought during many years of patient work For the conservationist and aviculturalist the accounts of captive breeding under headings such as infertility diet longevity mortality and the effects of foster mothers geographical latitude and genetic strain will be essential reading Appropriately Sir Peter Scott whose interest and involvement in the rescue of the Hawaiian Goose was of prime importance is one of the artists whose drawings supplement the text There is also a colour frontispiece and 24 monochrome plates EndFragment The Hawaiian Goose Janet

Kear,Andrew John Berger,1980 **The Hawaiian Goose** Janet Kear,2010 Dr Janet Kear Assistant Director of the Wildfowl Trust and Curator of its Martin Mere Reserve and Professor Andrew Berger of the University of Hawaii have written a timely and absorbing account of the recent history of the Hawaiian Goose or Nene its descent to near extinction its eleventh hour rescue and current restoration to the wild The species declined from an estimated population of 25 000 in Hawaii in the 18th century to less than fifty birds in the 1940s Today thanks largely to the extended breeding programmes at Slimbridge and Pohakuloa there are probably more than 2000 Hawaii **Conservation Biology of Hawaiian Forest Birds** Thane K. Pratt,Carter T. Atkinson,Paul C. Banko,Bethany L. Woodworth,James D. Jacobi,2009-01-01 Hawaii s forest bird community is the most insular and most endangered in the world and serves as a case study for threatened species globally Ten have disappeared in the past thirty years nine are critically endangered and even common species are currently in decline Thane K Pratt his coeditors and collaborators all leaders in their field describe the research and conservation efforts over the past thirty years to save Hawaii s forest birds They also offer the most comprehensive look at the reasons for these extinctions and attempts to overcome them in the future Among the topics covered in this book are trends in bird populations environmental and genetic factors limiting population size avian diseases predators and competing alien bird species Color plates by award winning local photographer Jack Jeffrey illustrate all living species discussed or described Creative Conservation P.J.

Olney, G. Mace, A. Feistner, 2012-12-06 Past progress and future challenges R J Wheeler Royal Zoological Society of Scotland Edinburgh UK In the past two decades much has been achieved in the sphere of breeding endangered species and we should be pleased that our co operative efforts have already borne so much fruit However on balance and despite the best efforts of conservationists the position of wildlife in the wild places where they are best conserved has become worse often dramatically worse Before returning to the United Kingdom in 1972 I was in Uganda for 16 years most of which time was spent as Chief Warden of Murchison Falls National Park Our main problem was that an over population of large mammals was having a devastating impact on the habitat Devastation was being wrought on woodland areas by the arrival of large numbers of elephants into the sanctuary of the Park following changes in land use in the areas outside the Park These changes were in response to the requirements of an ever expanding human population **Ency Worlds Zoos Vol 2 Only** Catharine E. Bell, 2024-11-01 This book includes a reference of the zoos in the world plus explanations and photographs of animals and which zoo they can be found in It is volume 2 and includes listings from G to P **Bird Conservation 2** Stanley A. Temple, 1985-05-31 Concerned conservationists and professional and amateur ornithologists alike welcomed the inauguration in 1983 of Bird Conservation Sponsored by the U S Section of the International Council for Bird Preservation the ambitious project was designed to provide a yearly overview of current research and key ecological topics in the field of bird conservation This the second yearbook of the series includes essays by leading ecologists and ornithologists and focuses on a range of issues critical to island birds among them the status of endangered birds of Micronesia the distribution and abundance of Hawaiian native birds the vulnerability of endemic island birds to extinction and bird conservation efforts in the United States Caribbean Also included are concise reports on recent bird conservation activities and research and an annotated bibliography of relevant literature **Endangered Animals** Brian Miller, Richard P. Reading, 2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate conservation

practice and to draw their own conclusions for improvement

Current Ornithology Richard Johnston, 2012-12-06 If it is still true that more than 80% of the ornithologists in North America are primarily interested or engaged in ecological studies on birds J R King and W J Bock Final Report of the Workshop on a National Plan For Ornithology 1978 then Volume 3 of Current Ornithology is preadapted for their consideration All but one article in this volume are somehow concerned with the ecological aspects of the biology of birds Variation in the scope of topical coverage is relatively broad and includes conservation reproduction behavior community structure and evolutionary ecology Three reviews concern the pervasive effects of man and industry on various bird populations of the world Risebrough provides a detailed description of the relationships between pesticides and bird populations Morrison assesses aspects of bird population numbers as indicators of environmental change and Temple outlines current research on endangered species The broad spectrum of reproductive ecology of birds is variously treated in this volume Jehl and Murray explore sexual selection and some of the resulting complexities in the evolution of sexual size dimorphism primarily in shorebirds Lawton and Lawton are concerned with the relationships between social behavior and breeding systems in which variation is found in the age at which reproduction is first undertaken Oring examines the wide ranging variation in polyandrous breeding systems in birds while Rohwer is concerned with adoption versus infanticide in birds and their relationships to reproductive fitness

A Field Guide to the Birds of Hawaii and the Tropical Pacific H. Douglas Pratt, Phillip L. Bruner, Delwyn G. Berrett, 2023-06-06 This is the first field guide to the identification of the birds of the islands of the tropical Pacific including the Hawaiian Islands Fiji Samoa Tonga southeastern Polynesia and Micronesia It is intended both as a reference for the expert and as an introduction to birding in the region for the novice Small enough to be carried afield it contains much previously unpublished information about behavior vocalizations ecology and distribution The forty five color plates depict all plumages of all bird species that breed in the islands as well as of those that regularly visit them and the surrounding oceans and of most species believed to be extinct on the islands Black and white figures show many of the rarer visitors Introductory sections discuss the tropical Pacific as an environment for birds problems of birding on islands and bird conservation Appendixes include maps of the island groups and a thorough bibliography
