Oppio, Stefano Capolongo**

The Health Care Facility Locator:

Decision Support System for the Location of Healthcare Facilities Marta Dell'Ovo, Alessandra Oppio, Stefano Capolongo, 2020-08-19 The book examines an integrated approach for addressing decisions about the location of healthcare facilities Supported by Geographic Information Systems GIS and Multi Criteria Decision Analysis MCDA the approach provides comprehensive information on territory taking into account the spatial dimensions Due to the multiple criteria involved site selection for urban facilities is a crucial topic in planning decision processes especially for healthcare facilities Healthcare provision policies generally fail to address the distribution of facilities within cities entrusting decisions to various stakeholders Moreover current evaluation tools focus on the intrinsic performances of healthcare structures disregarding the extrinsic characteristics namely those related to the location Starting with a cross disciplinary literature review the book describes a multi methodological approach for decision making regarding the location of healthcare facilities and presents an innovative evaluation tool that simultaneously considers functional locational environmental and economic issues providing a comprehensive overview of the areas under investigation

Decision Making in Healthcare Systems Tofigh Allahviranloo, Farhad Hosseinzadeh Lotfi, Zohreh Moghaddas, Mohsen Vaez-Ghasemi, 2023-12-31 This book chooses the topic which is due to the editors experience in modeling projects in healthcare systems Also the transfer of experiences is the reason why mathematical modeling and decision making in the field of health are not given much attention To this end the new aspect of this book is the lack of reference needed to carry out projects in the field of health for researchers whose main expertise is not modeling Students of health mathematics management and industrial engineering fields are in the direct readership with this book Different projects in the field of healthcare systems can use the topics presented in different chapters mentioned in this book

Facility Location Zvi Drezner, Horst W. Hamacher, 2004-05-03 The book covers both theory and applications of locational analysis LocAn The reader will see the power of LocAn models in various real world contexts varying from communication design to robotics and mail delivery It is divided into two parts The first part contains an overview of some of the LocAn methodologies The second part describes in thorough detail some selected applications The text provides researchers with an excellent and well thought out review of available location models

Engineering the System of Healthcare Delivery William B. Rouse, Denis A. Cortese, 2010 As the United States continues to debate reform of its healthcare system this book argues that providing health insurance for all without improving the delivery system will not improve the current problems of access affordability and quality The US healthcare system has many excellent components strong scientific input extraordinary technology for diagnosis and treatment dedicated staff and top class facilities among them But the system has evolved haphazardly over time and although it has not failed entirely the authors argue that like any system where attention is paid to individual components at the expense of the system as a whole it can never hope to succeed Above all they point out that the US system does not provide high value healthcare it has the highest costs in the world and

yet many other countries have lower infant mortality rates and better life expectancy Together with a team of highly regarded thought leaders the authors of this publication advocate a complete re thinking of healthcare from a systems perspective an engineering approach to healthcare and they then describe how to set about it Covering a wide range of subjects including health care costs and economics barriers to change integrated health systems electronic records and computer based patient support as well as patient safety and palliative and chronic care this book will be of interest to all those involved in healthcare provision whose goal is affordable care to promote healthy high quality lives [Health planning reports subject index](#) United States. Health Resources Administration,1979 [Operations Research Applications in Health Care Management](#) Cengiz Kahraman,Y. Ilker Topcu,2017-12-08 This book offers a comprehensive reference guide to operations research theory and applications in health care systems It provides readers with all the necessary tools for solving health care problems The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts of operations research for the management of operating rooms intensive care units supply chain emergency medical service human resources lean health care and procurement To foster a better understanding the chapters include relevant examples or case studies Taken together they form an excellent reference guide for researchers lecturers and postgraduate students pursuing research on health care management problems The book presents a dynamic snapshot on the field that is expected to stimulate new directions and stimulate new ideas and developments [Issues in Global, Public, Community, and Institutional Health: 2011 Edition](#) ,2012-01-09 Issues in Global Public Community and Institutional Health 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Global Public Community and Institutional Health The editors have built Issues in Global Public Community and Institutional Health 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Global Public Community and Institutional Health in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Global Public Community and Institutional Health 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> [The Urban Planner in Health Planning](#) American Society of Planning Officials,1968 **Advances in Managing Humanitarian Operations** Christopher W. Zobel,Nezih Altay,Mark P. Haselkorn,2015-12-17 This volume provides a survey of current research problems and results in humanitarian operations research Additionally it discusses existing applications of humanitarian operations research and considers new research efforts that clearly extend existing research and applications The book is divided into three sections that provide an overview of the subject a look at the theory and an examination of applications The overview section presents chapters on modeling

approaches and metrics to evaluate nonprofit operations chief findings of fieldwork research in disaster response logistics the use of cash as a form of relief and measuring markets that supply cash based humanitarian interventions The theory section includes chapters that examine the partner proliferation problem in disaster response networks a case study of humanitarian logistics that examines how humanitarian culture informs change adoption and a look at the current state of the art for information visibility in humanitarian operations Finally the application section focuses on blood products vaccines and food assistance with individual chapters on efficient inventorying and distribution of blood products during disasters a detailed look at modeling in the context of the vaccine supply chain a framework for achieving equity effectiveness and efficiency in food bank operations and a spatio temporal vulnerability assessment of the resilience of a population affected by sudden lack of food

New Frontiers in Applied Data Mining Longbing Cao,Joshua Zhexue Huang,James Bailey,Yun Sing Koh,Jun Luo,2012-02-15 This book constitutes the thoroughly refereed post conference proceedings of five international workshops held in conjunction with PAKDD 2011 in Shenzhen China in May 2011 the International Workshop on Behavior Informatics BI 2011 the Workshop on Quality Issues Measures of Interestingness and Evaluation of Data Mining Models QIMIE 2011 the Workshop on Biologically Inspired Techniques for Data Mining BDM 2011 the Workshop on Advances and Issues in Traditional Chinese Medicine Clinical Data Mining AI TCM 2011 and the Second Workshop on Data Mining for Healthcare Management DMGHM 2011 The book also includes papers from the First PAKDD Doctoral Symposium on Data Mining DSDM 2011 The 42 papers were carefully reviewed and selected from numerous submissions The papers cover a wide range of topics discussing emerging techniques in the field of knowledge discovery in databases and their application domains extending to previously unexplored areas such as data mining based on optimization techniques from biological behavior of animals and applications in Traditional Chinese Medicine clinical research and health care management
