Insects affect the health and well-being of humans every day everywhere, so the entomology departments that study them make a crucial contribution to many aspects of life. Indeed, agricultural success in the United States and other countries depends upon the work of entomology departments within the land grant system at universities across the nation. Entomology at the Land Grant University is a thorough look at how entomology departments have adapted to shifting demographics, changes in land use patterns, environmental issues and advances in the life sciences. It also highlights the leadership of entomologists in their multifaceted roles as researchers, teachers and consultants. With world-renowned contributors from both academia and industry, this volume is the culmination of a series of mini symposia celebrating the 100th anniversary of the Department of Entomology at Texas A M University. The centenary was a time to reflect on past accomplishments and to plan for future challenges, spotlighting the academic, scientific, economic and social importance of entomology. The result is a broad-brushed picture of a discipline that at its best represents the highest virtues of fundamental and applied science, with topics such as fulfilling the land grant university mission, roles of entomology departments, the function of the extension service, the global reach of entomological research, civic education in insect management, genetic engineering, future innovations in pest management and insecticide design. Not just for entomologists, this insightful look into the workings of a university department within the context of a rapidly changing scientific, social and economic climate will appeal to anyone associated with a land grant university, extension or regulatory agency or related industry.
