The Heroic Period Of Modern Architecture:

The Heroic Period of Modern Architecture Alison Smithson, Peter Smithson, 1981 *The Heroic Period of Modern Architecture*, 1965 Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations **The heroic period of modern architecture, by Alison and Peter Smithson** Alison Margaret Smithson, 1981 **Heroic period of modern architecture** A. Smithson, **Towards Universality** Richard Padovan, 2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier's creations was a self-contained universe within a clear frame while Mies fluctuated between these two perspectives *Pride in Modesty* Michelangelo Sabatino, 2011-05-21 Following Italy's unification in 1861 architects artists politicians and literati engaged in volatile debates over the pursuit of national and regional identity Growing industrialization and urbanization across the country contrasted with the rediscovery of traditionally built forms and objects created by the agrarian peasantry *Pride in Modesty* argues that these ordinary often anonymous everyday things inspired and transformed Italian art and architecture from the 1920s through the 1970s Through in-depth examinations of texts drawings and buildings Michelangelo Sabatino finds that the folk traditions of the pre-industrial countryside have provided formal practical and poetic inspiration directly affecting both design and construction practices over a period of sixty years and a number of different political regimes This surprising continuity allows Sabatino to reject the division of Italian history into sharply delimited periods such as Fascist Interwar and Democratic Postwar and to instead emphasize the long continuous process that transformed pastoral and urban ideals into a new modernist Italy **Peter Smithson** Peter Smithson, Catherine Spellman, Karl Unglaub, 2005-06-02 When Peter Smithson died in March 2003 architecture lost one of its most inspired practitioners incisive theorists and charismatic teachers Along with his late wife and partner Alison Smithson emerged in the postwar era as Britain's preeminent advocate of architectural modernism The Smithson's achieved cult figure status in the architectural world particularly among students who admired the power of their ideas and work But with no built projects in the U S they remained something of an enigma there Now as part of our Conversations with Students series Smithson's ideas will be made widely accessible in a handy and inexpensive format for the first time The Heroic Period of

Conservation Elain Harwood, Alan Powers, 2006-05 It was the 1960s just when the Smithsons were writing that conservation emerged in Britain as a mainstream aspect of architecture introducing precisely those issues about social purpose urbanism and ecology that were central to architecture's participation in the counterculture and its resistance to global capitalism The Heroic Period of Conservation reveals the significance of conservation in British architectural and cultural history of the last fifty years recapturing a valuable legacy that is now once more under threat

Archigram Simon Sadler, 2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitators of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was assembled from the Apollo missions constructivism biology manufacturing electronics and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture
