The Pearly Gates Of Cyberspace:

The Pearly Gates of Cyberspace Margaret Wertheim, 2000 Cyberspace may seem an unlikely gateway for the soul but as science commentator Wertheim argues in this wonderfully provocative Kirkus Reviews book cyberspace has in recent years become a repository for immense spiritual yearning 37 illustrations *The Pearly Gates of Cyberspace* Margaret Wertheim, 1999

The Pearly Gates of Cyberspace Margaret Wertheim, 2000 Arguing that one way of understanding cyberspace is as an attempt to realize an electronic version of heaven this book begins with the medieval definition of the world as spiritual space The author traces the emergence of modern physics with its emphasis on physical space and then presents her thesis that cyberspace an outgrowth of modern science nevertheless represents a return to medieval spiritual concerns *The Pearly Gates of Cyberspace* Margaret Wertheim, 1999 Tracing the combined story of physical and spiritual space from the Middle Ages to the present Wertheim reveals the appeal of cyberspace and its ultimate failure to satisfy one's spiritual needs

Religion and Cyberspace Morten Hojsgaard, Margit Warburg, 2005-09-15 In the twenty first century religious life is increasingly moving from churches mosques and temples onto the Internet Today anyone can go online and seek a new form of religious expression without ever encountering a physical place of worship or an ordained teacher or priest The digital age offers virtual worship cyber prayers and talk boards for all of the major world faiths as well as for pagan organisations and new religious movements It also abounds with misinformation religious bigotry and information terrorism Scholars of religion need to understand the emerging forum that the web offers to religion and the kinds of religious and social interaction that it enables Religion and Cyberspace explores how religious individuals and groups are responding to the opportunities and challenges that cyberspace brings It asks how religious experience is generated and enacted online and how faith is shaped by factors such as limitless choice lack of religious authority and the conflict between recognised and non recognised forms of worship Combining case studies with the latest theory its twelve chapters examine topics including the history of online worship virtuality versus reality in cyberspace religious conflict in digital contexts and the construction of religious identity online Focusing on key themes in this groundbreaking area it is an ideal introduction to the fascinating questions that religion on the Internet presents

Digital Performance Steve Dixon, 2007-02-23 The historical roots key practitioners and artistic theoretical and technological trends in the incorporation of new media into the performing arts The past decade has seen an extraordinarily intense period of experimentation with computer technology within the performing arts Digital media has been increasingly incorporated into live theater and dance and new forms of interactive performance have emerged in participatory installations on CD ROM and on the Web In Digital Performance Steve Dixon traces the evolution of these practices presents detailed accounts of key practitioners and performances and analyzes the theoretical artistic and technological contexts of this form of new media art Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the deus ex machina of classical Greek drama to

Wagner's Gesamtkunstwerk concept of the total artwork and draws parallels between contemporary work and the theories and practices of Constructivism Dada Surrealism Expressionism Futurism and multimedia pioneers of the twentieth century For a theoretical perspective on digital performance Dixon draws on the work of Philip Auslander Walter Benjamin Roland Barthes Jean Baudrillard and others To document and analyze contemporary digital performance practice Dixon considers changes in the representation of the body space and time He considers virtual bodies avatars and digital doubles as well as performances by artists including Stelarc Robert Lepage Merce Cunningham Laurie Anderson Blast Theory and Eduardo Kac He investigates new media's novel approaches to creating theatrical spectacle including virtual reality and robot performance work telematic performances in which remote locations are linked in real time Webcams and online drama communities and considers the extratemporal illusion created by some technological theater works Finally he defines categories of interactivity from navigational to participatory and collaborative Dixon challenges dominant theoretical approaches to digital performance including what he calls postmodernism's denial of the new and offers a series of boldly original arguments in their place

Stealing Fire from Heaven Nevill Drury, 2011 Despite the dramatic expansion of modern technology which defines and dominates many aspects of contemporary life and thought the Western magical traditions are currently undergoing an international resurgence In this overview of the modern occult revival Drury traces the rise of various forms of magical belief and practice

Interfaith Encounters in America Kate McCarthy, 2007-03-28 From its most cosmopolitan urban centers to the rural Midwest the United States is experiencing a rising tide of religious interest While terrorist attacks keep Americans fixed on an abhorrent vision of militant Islam popular films such as *The Passion of the Christ* and *The Da Vinci Code* make blockbuster material of the origins of Christianity The 2004 presidential election we are told was decided on the basis of religiously driven moral values A majority of Americans are reported to believe that religious differences are the biggest obstacle to world peace Beneath the superficial banter of the media and popular culture however are quieter conversations about what it means to be religious in America today conversations among recent immigrants about how to adapt their practices to life in new land conversations among young people who are finding new meaning in religions rejected by their parents conversations among the religiously unaffiliated about eclectic new spiritualities encountered in magazines book groups or online *Interfaith Encounters in America* takes a compelling look at these seldom acknowledged exchanges showing how despite their incompatibilities Buddhist Muslim Christian Jewish and Hindu Americans among others are using their beliefs to commit to the values of a pluralistic society rather than to widen existing divisions Chapters survey the intellectual exchanges among scholars of philosophy religion and theology about how to make sense of conflicting claims as well as the relevance and applicability of these ideas on the ground where real people with different religious identities intentionally unite for shared purposes that range from national public policy initiatives to small town community interfaith groups from couples negotiating interfaith marriages to those exploring religious issues with

strangers in online interfaith discussion groups Written in engaging and accessible prose this book provides an important reassessment of the problems values and goals of contemporary religion in the United States It is essential reading for scholars of religion sociology and American studies as well as anyone who is concerned with the purported impossibility of religious pluralism

The Architecture of Intelligence Derrick De Kerckhove, 2001 A refreshingly unconventional look at architecture and the World Wide Web Using Vitruvius classical text *De Architectura* as a starting point De Kerckhove begins a journey into the exciting world of the Internet On the one hand he explores the architecture of this revolutionary medium on the other he considers the wide ranging opportunities which the IT world offers for architectonic design revealing how this new medium for communication is as much based on tradition as on innovation Derrick de Kerckhove is the Director of the McLuhan Institute and Professor at the University of Toronto His research into the effects of innovative technology on human communication of new media on traditional culture have gained worldwide recognition
