The Perplexities Of Modern International Law:

The Perplexities of Modern International Law Académie de Droit International de la Ha Staff, Shabtai Rosenne, 2002
The Academy is an institution for the study and teaching of Public and Private International Law and related subjects Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law The contents of this volume consist of The Perplexities of Modern International Law General Course on Public International Law by Sh ROSENNE former Ambassador of Israel Jerusalem To access the abstract texts for this volume please click here [Recueil des Cours](#) Hague Academy of International Law. Center for Studies and Research, 2002-06-24 The title of Shabtai Rosenne s general course on public international law is inspired by the major work of the medieval Jewish philosopher and jurist Moses Maimonides These perplexities follow from the conviction that universal peace will become a reality when the world will have a workable rational balanced and accepted general system of international law and impartial and appropriate instruments to enforce it in times of crisis However the world has not yet reached that state The author stresses the importance of the close linkage between law and history and it is with this in mind that Shabtai Rosenne approaches the principal themes of public international law He examines the sources or international law the international courts and tribunals the use of force international humanitarian law human rights international personality maritime spaces space the written word responsibilities and remedies Lastly the author also pays attention to the United Nations system Publisher s description [The Perplexities of Modern International Law](#) Shabtai Rosenne, 2004 Rosenne presents a revised and updated version of the General Course in Public International Law which the author delivered at the Hague Academy of International Law in 2001 The General Course was previously published in volume 291 of the Recueil des cours Collected Courses of the Hague Academy u [Essays on International Law and Practice](#) Shabtai Rosenne, 2007-05-30 This volume collects papers written by Shabtai Rosenne in the course of his distinguished career on various topics primarily in the areas in which he is best known for his expertise international litigation and courts the law of treaties the law of the sea and state responsibility His writing on fact finding before the International Court of Justice treaty succession codification and the framework agreement as the basis for the jurisdiction of the ICJ in particular remain as interesting timely and essential today as when they were first written The collection is accompanied by a table of cases a table of treaties and an index for easy reference [The Application of Teachings by the International Court of Justice](#) Sondre Torp Helmersen, 2021-03-04 How do the judges of the International Court of Justice the most authoritative court in international law use teachings when deciding cases This book is the first book length examination of how teachings are used in an important international institution It uses three different methodologies a traditional legal analysis an empirical

analysis where citations of teachings are counted and interviews with judges and staff Three main patterns are identified teachings have generally low weight but this weight varies between different works and between different judges The book suggests explanations for the patterns it identifies in order to contribute to understanding not only when and how teachings are used but also why and compares the Court's practice with that of other international courts and tribunals This study fills a gap in the international legal literature and will be essential reading for scholars and practicing international lawyers

WTO Trade Remedies in International Law Roberto Soprano, 2018-07-24 World Trade Organisation WTO trade remedies antidumping anti subsidy and safeguard agreements are instruments used by WTO members to counter the economic injury caused by dumping subsidies and the sudden and unforeseen increased imports They are exceptions to the WTO principle of free trade and to the prohibition for States to react unilaterally to protect their own rights and interests and as a result they have been accused by some as being the new tools of protectionism This book analyses of the role and principles of WTO trade remedies in international law In particular it focuses on their aims their structure and their position within the WTO and more in general the international legal system The book considers trade remedies in light of fragmentation theories of international law and addresses the question how and to what extent WTO law reflects and influences public international law

General Principles of Law in the Decisions of International Criminal Courts and Tribunals Fabián Raimondo, 2008-11-30 International lawyers usually disregard the vital functions that general principles of law may play in the decisions of international courts and tribunals As far as international criminal law is concerned general principles of law may be crucial to the outcome of an international trial inter alia because the conviction of an accused in respect of a particular charge may depend on the existence of a given defence under this source This volume examines the role that general principles of law have played in the decisions of international criminal courts and tribunals In particular it analyses their alleged subsidiary nature their process of determination and their transposition from national legal systems into international law It concludes that general principles of law have played a significant role in the decisions of international criminal courts and tribunals not only by filling legal gaps but also by being a fundamental means for the interpretation of legal rules and the enhancement of legal reasoning
