Shaping British Foreign and Defence Policy in the Twentieth Century M. Murfett, 2014-07-31 This volume is devoted to the shaping of British foreign and defence policymaking in the twentieth century and illustrates why it is relatively easy for states to lose their way as they grope for a safe passage forward when confronted by mounting international crises and the antics of a few desperate men      **June 1940, Great Britain and the First Attempt to Build a European Union** Andrea Bosco, 2016-06-22 June 1940 represents a significant moment in British history The decision to leave the European Union at the most critical period since its existence could bring unpredictable and far reaching consequences both for the United Kingdom and the Union itself June 1940 was also a turning point in British history On the afternoon of 16 June a few hours before the French Government opted for the capitulation Churchill made on behalf of the British Government an offer of indissoluble union When a sceptical Churchill put forward to the British Cabinet the text of the declaration drafted by Jean Monnet Sir Arthur Salter and Robert Vansittart he was surprised at the amount of support it received The Cabinet adopted the document with some minor amendments and de Gaulle who saw it as a means of keeping France in the war telephoned Reynaud with the proposal for an indissoluble union with joint organs of defence foreign financial and economic policies a common citizenship and a single War Cabinet The proposal however never reached the table of the French Government The spirit of capitulation embodied in Weygand and Pétain prevailed and France submitted herself to the German will for the second time in seventy years After the Munich crisis Great Britain had to face the danger of another European war with the inevitable loss of the Empire and it was at this point that the country first began to favour the application of the federalist principle to Anglo French relations In this conversion to federalism a fundamental role was played by the Federal Union the first federalist movement organised on a popular basis The contribution of Federal Union to the development of the federal idea in Great Britain and Europe was to express and organise the beginning of a new political militancy and it represented

the first step of a historical process the overcoming of the nation State the modern political formula which institutionalises the political division of mankind This study principally examines the first eighteen months of the Federal Union during which time it was able to raise itself to the attention of the general public and the political class as the heir of the League of Nations Union The research is based on extensive unpublished archival material found across the globe from London Oxford Brighton and Edinburgh to Washington Paris and Geneva

A History of International Thought Lucian Ashworth,2014-01-10 International thought is the product of major political changes over the last few centuries especially the development of the modern state and the industrialisation of the world economy While the question of how to deal with strangers from other communities has been a constant throughout human history it is only in recent centuries that the question of foreign relations and especially imperialism and war have become a matter of urgency for all sectors of society throughout the world This book provides the first comprehensive overview of the evolution of Western international thought and charts how this evolved into the predominantly Anglophone field of International Relations Along the way several myths of the origins of International Relations are explored and exposed the myth of the peace of Westphalia the myths of Versailles and the nature of the League of Nations the realist idealist Great Debate myth and the myth of appeasement Major approaches to the study of international affairs are discussed within their context and on their own terms rather than being shoe horned into anachronistic paradigms Written in a clear and accessible style Ashworth s analysis reveals how historical myths have been used as gatekeeping devices and how a critical re evaluation of the history of international thought can affect how we see international affairs today

**Worldmaking** David Milne, 2015-09-22 A new intellectual history of U S foreign policy from the late nineteenth century to the present Worldmaking is a compelling new take on the history of American diplomacy Rather than retelling the story of realism versus idealism David Milne suggests that U S foreign policy has also been crucially divided between those who view statecraft as an art and those who believe it can aspire to the certainty of science Worldmaking follows a cast of characters who built on one another's ideas to create the policies we have today Woodrow Wilson's Universalism and moralism led Sigmund Freud to diagnose him with a messiah complex Walter Lippmann was a syndicated columnist who commanded the attention of leaders as diverse as Theodore Roosevelt Lyndon Johnson and Charles de Gaulle Paul Wolfowitz was the intellectual architect of the 2003 invasion of Iraq and an admirer of Wilson's attempt to make the world safe for democracy Each was engaged in a process of worldmaking formulating strategies that sought to deploy the nation's vast military and economic power or sought to retrench and focus on domestic issues to shape a world in which the United States would be best positioned to thrive Tracing American statecraft from the age of steam engines to the age of drones Milne reveals patterns of worldmaking that have remained impervious to the passage of time The result is a panoramic history of U S foreign policy driven by ideas and by the lives and times of their authors
