Healing Gardens Clare Cooper Marcus, Marni Barnes, 1999-06-15 Although the healing qualities of nature have been recognized and relied on for centuries as a valuable part of convalescence recent history has seen nature s therapeutic role virtually eclipsed by the technological dominance of modern medicine As the twentieth century comes to a close and the medical community reacknowledges the importance of the environment to recovery the healing garden is emerging as a supplement to drug or technology based treatments Healing Gardens celebrates this renewed interest in nature as a catalyst for healing and renewal by examining the different therapeutic benefits of healing gardens and offering essential design guidance from experts in the field Unique and comprehensive Healing Gardens provides up to date coverage of research findings relevant design principles and approaches and best practice examples of different types of healing gardens It begins

by exploring what current research reveals about the connection between nature human stress reduction and medical outcomes It then presents case studies and design guidelines for outdoor spaces in medical settings that include general psychiatric and children s hospitals as well as hospices nursing homes and Alzheimer s facilities Historical information literature reviews and studies on use are included for each type of outdoor space covered offering important insights into what works in healing gardens and what doesn t Generously supplemented with photographs site plans anecdotes and more Healing Gardens is an invaluable practical guide for landscape architects and others involved in creating and maintaining medical facilities and an extremely useful reference for those responsible for patient care A unique and comprehensive look at the therapeutic effects and design of healing gardens For more and more people the shortest road to recovery is the one that leads through a healing garden Combining up to date information on the therapeutic benefits of healing gardens with practical design guidance from leading experts in the field Healing Gardens is an important resource for landscape architects and others working in this emerging area With the help of site plans photographs and more it presents design guidelines and case studies for outdoor spaces in a range of medical settings including Acute care general hospitals Psychiatric hospitals Children s hospitals Nursing homes Alzheimer s facilities Hospices

Design Intervention (Routledge Revivals) Wolfgang F. E. Preiser, Jacqueline Vischer, Edward White, 2015-05-15 Design Intervention Toward a More Humane Architecture first published in 1991 intends to demonstrate that interest in social issues is alive and well in architecture that there is a small but effective cadre of dedicated professionals who continue to commit themselves to solving social problems and that architecture is being applied to the alleviation of the social ills of our time The editors and contributors in this book have all grappled with their own definitions of design innovation and express in practical and useful ways their ideas for contributing to a better and less needy world through the architecture they describe This book will be of interest to students of architecture

experiences and challenges of public planning and management professionals involved with the growing ageing population are presented and will require greater association and collaboration with the academic and scientific fields of Environmental Gerontology

University-Linked Retirement Communities Leon A Pastalan, Benjamin Schwarz, 2016-09-16 University Linked Retirement Communities focuses on the special attributes of a retirement community designed as an integral part of a university. It discusses the theoretical and practical aspects of such a retirement community which provides a rich and varied context for older people to be exposed to new ideas and learning opportunities for personal growth. The book centers on the premise that knowledge of basic principles of human behavior helps clarify understanding of the relationship between environment and behavior. Grounded in current research in the field of environment and aging, the book helps readers consider how the environment lends different aesthetic experiences and activity patterns to people of different backgrounds and capabilities. Some of the major environment and design issues chapters address are person environment fit, privacy, personal space, wayfinding, barrier free design, healthcare, personal growth, site development. University Linked Retirement Communities was developed from a two term course offered at the University of Michigan College of Architecture and Urban Planning that dealt with aging and the environment. The book is divided into two parts. Chapters in the first section discuss a variety of issues including the meaning of community, a day in the life of an elderly person living in a retirement community, site evaluation for a theoretical retirement community, and reviews of different physical components for a retirement community. The second section contains four student presentations of designs for a retirement community and comments on the projects from a design jury. This book is a valuable source of information for a variety of readers. University Linked Retirement Communities is of interest to potential users of eldercare services and their families, service providers, designers, architects, policymakers, and developers dealing with the elderly, and educators and students of architecture, environmental design, and other fields who are involved in housing and care options for senior adults.

Therapeutic Landscapes Clare Cooper Marcus, Naomi A Sachs, 2013-09-20 This comprehensive and authoritative guide offers an evidence based overview of healing gardens and therapeutic landscapes from planning to post occupancy evaluation. It provides general guidelines for designers and other stakeholders in a variety of projects as well as patient specific guidelines covering twelve categories ranging from burn patients, psychiatric patients to hospice and Alzheimer's patients among others. Sections on participatory design and funding offer valuable guidance to the entire team, not just designers, while a planting and maintenance chapter gives critical information to ensure that safety, longevity, and budgetary concerns are addressed.

Aging in the Designed Environment Margaret Christenson, Ellen D Taira, 2014-04-08 Aging in the Designed Environment is the key sourcebook for physical and occupational therapists developing and implementing environmental designs for the aging. The physical environment remains one of the most overlooked areas in environmental design. In order to move beyond this status quo

persons responsible for planning elderly environments must develop a new understanding of ways in which their influence can improve the older adult's physical and mental functioning. Occupational and physical therapists as well as other health care professionals will benefit tremendously from the information presented in this unique volume. Designers, developers, and others with minimal health care background will also find a wealth of possibilities within *Aging in the Designed Environment*. Many concerns are dealt with in the book's five sections. The first section describes the implications that occur when there are changes in vision, hearing, taste, smell, touch, and the kinesthetic systems. Recommendations for environmental adaptation and modifications which may compensate for the changes in each of these systems are suggested. The second section stresses the relationship between behavior and environment. A variety of environmental attributes: comfort, privacy, accessibility, control, security, dignity, and their impacts are discussed along with information on ways that attributes can be incorporated into the living settings of older people. In section three, the focus is on the older person living independently in his or her own home, and section four covers exclusively the design and selection of chairs for older adults. New ways to assess and evaluate the home to promote independence beyond the traditional activities of daily living are addressed. The last section deals with redesigning the existing long-term care facility. The author examines some of the environmental conditions existing in specific facilities and provides recommendations to compensate for these circumstances. **Journal of Rehabilitation Research & Development**, 2007

Growing with Gardening Bibby Moore, 1989. Offers guidance in planning a year-round horticultural program with activities organized by month plus program development and evaluation guidelines and a teacher's guide to gardening skills. **Design for Assisted Living** Victor Regnier, 2003-02-28. Destined to become the defining work on the subject, this timely reference addresses the single fastest growing segment of the senior living industry: assisted living for those who are unable to live independently but who do not need intensive nursing home care, meals, housekeeping, or twenty-four-hour access to medical assistance. Victor Regnier's visually rich guide includes dozens of design solutions from successful assisted living facilities along with fifteen case studies from the U.S. and Europe. The book also covers recent developments in the industry including major changes in financing, growth of dementia, and interest in aging in place. All in all, this is the most comprehensive guide to assisted living design that you'll find in any single volume. **California. Court of Appeal (4th Appellate District). Division 2.
