teaching and a key reference for academics in the fields of Human Geography Sociology Political Science Applied Philosophy Planning Urban Theory and Urban Studies Practitioners and activists in the field will also find the book of relevance The Politics of Leisure Rudy Dunlap, Justin Harmon, Jeff N. Rose, 2021-11-24 This book explores entanglements between politics and leisure ranging from the electorate's concerns with public recreation resources to the presence of politics in casual conversation and to the use of leisure as a means of preserving racial hierarchies in society In noting the contributions of past scholarship it also points toward a trend of increasingly political leisure research where research helps to unpack the multiple ways in which power suffuses the experience of leisure A contrast between being political on one hand and the tribal politicization that characterizes much of contemporary social life on the other hand demonstrates that scholars and educators can and should be engaged in politically oriented scholarship while also building a more diverse and intellectually productive academy This edited volume will be of great interest to researchers and scholars interested in race power polarization and the interrelationship between politics and leisure The chapters in this book were originally published as a special issue of the journal Leisure Sciences

Parkour and the City Jeffrey L. Kidder, 2017-04-20 In the increasingly popular sport of parkour athletes run jump climb flip and vault through city streetscapes resembling urban gymnasts to passersby and awestruck spectators In *Parkour and the City* cultural sociologist Jeffrey L Kidder examines the ways in which this sport involves a creative appropriation of urban spaces as well as a method

of everyday risk taking by a youth culture that valorizes individuals who successfully manage danger Parkour's modern development has been tied closely to the growth of the internet The sport is inevitably a YouTube phenomenon making it exemplary of new forms of globalized communication Parkour's dangerous stunts resonate too Kidder contends with a neoliberal ideology that is ambivalent about risk Moreover as a male dominated sport parkour with its glorification of strength and daring reflects contemporary Western notions of masculinity At the same time Kidder writes most athletes known as traceurs or freerunners reject a daredevil label preferring a deliberate reasoned hedging of bets with their own safety rather than a pushing the edge ethos normally associated with extreme sports

Diversity, equity and inclusion in sport and leisure Katherine Dashper, Thomas Fletcher, 2016-01-08 Despite the mythology of sport bringing people together and encouraging everyone to work collectively to success modern sport remains a site of exclusionary practices that operate on a number of levels Although sports participation is in some cases at least becoming more open and meritocratic at the management level it remains very homogenous dominated by western white middle aged able bodied men This has implications both for how sport develops and how it is experienced by different participant groups across all levels Critical studies of sport have revealed that rather than being a passive mechanism and merely reflecting inequality sport via social agents interactions with sporting spaces is actively involved in producing reproducing sustaining and indeed resisting various manifestations of inequality The experiences of marginalised groups can act as a resource for explaining contemporary political struggles over what sport means how it should be played and by whom and its place within wider society Central to this collection is the argument that the dynamics of cultural identities are contextually contingent influenced heavily by time and place and the extent to which they are embedded in the culture of their geographic location They also come to function differently within certain sites and institutions be it in one's everyday routine or leisure pursuits such as sport Among the themes and issues explored by the contributors to this volume are social inclusion and exclusion in relation to class race and ethnicity gender and sexuality social identities and authenticity social policy deviance and fandom This book was published as a special issue of Sport in Society

The Global Politics of Sport Lincoln Allison, 2005 Sport presents one of the most advanced cases of globalisation arguably because there are fewer cultural and political obstacles to the development of trade and international power in sport than there are in other fields Thus there has been a change in the nature of the politics of sport since the end of the Cold War the subject must be rewritten to acknowledge a twenty first century world in which international sporting organisations and transnational corporations have become far more important than states The Global Politics of Sport presents a range of essays examining the emerging global political issues in twenty first century sport including The role and power of organisations such as FIFA and the IOC The influence of US exceptionalism The construction of global sports heroes Tensions developing within traditionally alternative sports in a global commercial culture The Global Politics of Sport presents new and fresh exploration of different conceptions of sport as a purely commercial activity and as

an activity as embodying higher social and ethical values *Deconstructing Sport History* Murray G. examine the role of art against a backdrop of globally rising urban populations taking into account the more recent performative and relational turns of art that have sought in their city settings to identify a participating spectator an implicated citizen In exploring how artworks present themselves as a means by which to navigate and plot the city for a writing interlocutor Nicolas Whybrow discusses diverse examples representing three key modern modalities of urban arts practice The first walking involves works by Richard Wentworth Francis Alÿs Mark Wallinger and others the second play includes art by Antony Gormley Mark Quinn and Carsten Holler The third cultural memory Whybrow addresses through the controversial urban holocaust memorial sites of Peter Eisenman's memorial in Berlin and Rachel Whiteread's in Vienna

combines a practitioner's zest with astonishing erudition. As she examines these forms we see that they are inextricable from landscapes, bodily practices and cultural production. Looking more closely we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world. **The Nordic Model and Physical Culture** Mikkel Tin, Frode Telseth, Jan Ove Tangen, Richard Giulianotti, 2019-11-26. This book examines the relationships between the Nordic social democratic welfare system, The Nordic Model and physical culture across the domains of sport, education and public space. Presenting important new empirical research, it helps us to understand how the paradoxical blend of social democracy and liberalism in the Nordic countries influences physical culture, which in turn contributes to a quality of life that ranks highest in the world. Drawing on perspectives from sociology, cultural studies, history, education, political science, outdoor studies and urban studies, the book explores topics such as dance education for sport students, doping in cross-country skiing, outdoor education, the active body and the ideology of public parks. It includes research material from across the region including Norway, Sweden, Iceland, Finland and Denmark. This is fascinating reading for anyone with an interest in physical culture, sport studies, leisure studies or outdoor studies, as well as sociologists or political scientists with an interest in Nordic politics, culture and society. **Urban Mindscapes of Europe**, 2016-08-01. Urban mindscapes are structures of thinking about a city built on conceptualisations of the city's physical landscape as well as on its image as transported through cultural representation, memory and imagination. This book pursues three main strands of inquiry in its exploration of these landscapes of the mind in a European context. The first strand concerns the theory and methodology of researching urban mindscapes and urban imaginaries. The second strand investigates some of the representations, symbols and collective images that feed into our understanding of European cities. It discusses representations of the city in literature, film, television and other cultural forms which, in James Donald's phrase, constitute archives of urban images. The third and last section of the volume concentrates on the relationship between the collective mindscapes of cities, urban policy and the practice of city marketing. **Urban Interstices: The Aesthetics and the Politics of the In-between** Andrea Mubi Brighenti, 2016-02-11. Bringing together a team of international scholars with an interest in urban transformations, spatial justice and territoriality, this volume questions how the interstice is related to the emerging processes of partitioning, enclave making and zoning, showing how in-between spaces are intimately related to larger flows, networks, territories and boundaries. Illustrated with a range of case studies from places such as the US, Quebec, the UK, Italy, Gaza, Iraq, India and South-east Asia, the volume analyses the place and function of interstitial locales in both a disciplined urban space and a disordered space conceptualized through the notions of excess, danger and threat. Warning not to romanticize the interstice, the book invites us to study it as not simply a place but also a set of phenomena, events and social interactions. How are interstices perceived and represented? What is the politics of visibility that is applied to them? How to capture their peculiar rhythms, speeds and affects? On the one hand, interstices open up venues for informality.

improvisation challenge and bricolage playful as well as angry statements on the neoliberal city and enhanced urban inequalities On the other hand they also represent a crucial site of governance even governance by withdrawal and urban management where an array of techniques ranging from military urbanism to new forms of value extraction are experimented At the point of convergence of all these tensions interstices appear as veritable sites of transformation where social forces clash and mesh prefiguring our urban future The book interrogates these territories proposing new ways to explore the dynamics events and visibilities that define them
