Social Representations Studies In Social Psychology:

Social Representations Serge Moscovici, 2001 Considered the leading contemporary European social psychologist for his groundbreaking work on social influence and crowd psychology Serge Moscovici has played a definitive role in shaping the trajectory of modern social inquiry Bringing together the key texts in which he outlines and defines his benchmark theory of social representations including several essays never previously published in English his indispensable sourcebook illustrates the enormous range and scope of Moscovici's work Moscovici purports a theory of social representations remarkably distinct from the dominant themes in contemporary U S social psychology In contrast to the traditionally individualistic emphasis Moscovici's work is embedded in a broader social and cultural tradition and is passionately concerned with the social context in which meaning is constructed and lives are enacted His radical and lucid approach offers fresh and multifarious ways of seeing the world while his clear and coherent perspective provides a rich contribution to a discipline which has been notoriously fragmented Addressing contemporary social phenomena rather than being trapped within the artificial limits of laboratory experimentation Moscovici draws upon the diverse traditions of the wider social sciences making him a primary voice within the community of social theorists Sure to fascinate any researcher scholar student or practitioner of social psychology **Social Representations** provides a representative and long overdue collection of Moscovici's unique and important work

Social Representations Robert M. Farr, Serge Moscovici, 1984 **Everyday Discourse and Common Sense** Wolfgang Wagner, Nicky Hayes, 2017-09-16 Thinking and talking in everyday life differs from thinking and talking in more formal contexts and that difference is not always taken into account in social psychology What is needed is an approach that sets the man and woman in the street as competent actors in their own right rather than just pinpointing their alleged cognitive shortcomings This book proposes the theory of Social Representations which allows us to articulate collective and individual psychological processes as a solution The text begins with a general analysis of everyday thinking in psychology discussing research into socio political popular scientific and cultural systems of common sense The theory is presented through both classic and contemporary research into the construction of the social world from the individual level of representations as metaphors images and cognitive structures to collective phenomena such as dialogue discourse and shared understandings The concluding chapters cover epistemological and methodological developments in the field This book is the first comprehensive integrative and book length treatment of Moscovici's Theory of Social Representations in the English language

Transforming Social Representations S. Caroline Purkhardt, 2015-06-19 Common sense by definition is familiar to us all Science for some of us is more remote yet it is not always clear what the connections are between these two ways of seeing the world In this title originally published in 1993 the author explores several related themes in social psychology to elucidate the way we understand the social construction of knowledge and the means by which we change social reality From the perspective of a critique of social representations theory the author argues that this necessitates a change of viewpoint from the individualistic and mechanistic assumptions of Cartesian science to the social and evolutionary perspective of a Hegelian framework This not only emphasizes the cultural and historical dimensions of social phenomena but also illuminates the social and dynamic nature of individuals As a consequence the discipline of social psychology must itself be transformed recognizing the active participation of scientists in the social construction of scientific knowledge This title will be of interest to those working in social psychology history and philosophy of science and sociology
