Social Science And The Politics Of Modern Jewish Identity:

Social Science and the Politics of Modern Jewish Identity Mitchell Bryan Hart, 2000 This book traces the emergence and development of an organized institutionalized Jewish social science and explores the increasing importance of statistics and other modes of analysis for Jewish elites throughout Europe and the United States The Zionist movement provided the initial impetus as it looked to the social sciences to provide the knowledge of contemporary Jewish life deemed necessary for nationalist revival The social sciences offered empirical evidence of the ambiguous condition of the Jewish diaspora and also charted emancipation and assimilation viewed as dissolutions of and threats to Jewish identity Liberal assimilationist scholars also utilized social science data to demonstrate the continuing viability of Jewish life in the diaspora Jewish social science grew out of a sustained effort to understand and explain the effects of modernization on Jewry Above all Jewish scholars sought to give the enormous transformations undergone by Jewry in the nineteenth century a larger meaning and significance

Social Science and the Politics of Modern Jewish Identity Mitchell B. Hart, 2022 Why did the social sciences become an integral part of Jewish scholarship beginning in the late nineteenth century What part did this new scholarship play in the ongoing debate over emancipation and assimilation Zionism and diasporism the nature of Jewish identity and the problem of Jewish continuity and survival To answer these questions this book traces the emergence and development of an organized Jewish social science in central Europe and explores the increasing importance of statistics and other social science modes of analysis for Jewish elites throughout Europe and in the United States The author locates the initial impetus for an organized institutionalized Jewish social science in the Zionist movement as Zionists looked to the social sciences to provide them with the knowledge of contemporary Jewish life deemed necessary for nationalist revival In particular the social sciences offered empirical evidence of the ambiguous condition of Jewry in the diaspora Social science also charted emancipation and assimilation which were viewed as disintegrative agents for the dissolution of Jewish identity and hence as a threat to the Jewish future For Zionists nationalism offered the means to reverse the process of dissolution Yet Zionists were not alone in turning to the social sciences to advance their political agenda This study also examines the involvement of non Zionists in Jewish social science focusing on the way liberal assimilationist scholars utilized social science data to demonstrate the continuing viability of Jewish life in the diaspora Jewish social science grew out of a sustained effort to understand and explain the effects of modernization on Jewry Above all Jewish scholars sought to give the enormous transformations undergone by Jewry in the nineteenth century a larger meaning and significance

Modernity and the Jews in Western Social Thought Chad Alen Goldberg, 2017-05-22 In the late nineteenth and early twentieth centuries prominent social thinkers in France Germany and the United States sought to understand the modern world taking shape around them Although they worked in different national traditions and emphasized different features of modern society they repeatedly invoked Jews as a touchstone for defining modernity and national identity in a context of rapid social change In

Modernity and the Jews in Western Social Thought Chad Alan Goldberg brings us a major new study of Western social thought through the lens of Jews and Judaism In France where antisemites decried the French Revolution as the Jewish Revolution mile Durkheim challenged depictions of Jews as agents of revolutionary subversion or counterrevolutionary reaction When German thinkers such as Karl Marx Georg Simmel Werner Sombart and Max Weber debated the relationship of the Jews to modern industrial capitalism they reproduced in secularized form cultural assumptions derived from Christian theology In the United States William Thomas Robert Park and their students conceived the modern city and its new modes of social organization in part by reference to the Jewish immigrants concentrating there In all three countries social thinkers invoked real or purported differences between Jews and gentiles to elucidate key dualisms of modern social thought The Jews thus became an intermediary through which social thinkers discerned in a roundabout fashion the nature problems and trajectory of their own wider societies Goldberg rounds out his fascinating study by proposing a novel explanation for why Jews were such an important cultural reference point He suggests a rethinking of previous scholarship on Orientalism Occidentalism and European perceptions of America arguing that history extends into the present with the Jews and now the Jewish state continuing to serve as an intermediary for self reflection in the twenty first century

Hybrid Hate Tudor Parfitt, 2020 The study of western racism has tended to concentrate either on the hatred and murder of Jews or the hatred and enslavement of black people As chief objects of racism Jews and Blacks have been linked together for centuries peoples apart from the general run of humanity In medieval Europe Jews were often perceived as Blacks and the conflation of Jews and Blacks continued throughout the period of the Enlightenment With the discovery of a community of Black Jews in Loango in west Africa in 1777 and later of black Jews in India the Middle East and other parts of Africa the figure of the hybrid black Jew was thrust into the maelstrom of evolving theories about race hierarchies and taxonomies The new hybrid played a particular role in the great battle between monogenists and polygenists as they sought to establish the unitary or disparate origins of humankind From the mid nineteenth century to the period of the Third Reich Jews and Blacks were increasingly conflated in a racist discourse which combined the two fundamental racial hatreds of the west While Hitler considered Jews Negroid parasites in Nazi Germany as in Fascist Italy through texts laws and cartoons Jews and Blacks were combined in the figure of the Black Jew the mortal foe of the Aryan race

Ethnicity and Beyond Eli Lederhendler, 2011-03-08 Volume XXV of the distinguished annual Studies in Contemporary Jewry explores new understandings and approaches to Jewish ethnicity In current parlance regarding multicultural diversity Jews are often considered to belong socially to the majority whereas otherness is reserved for minorities But these group labels and their meanings have changed over time This volume analyzes how ethnic ethnicity and identity have been applied to Jews past and present individually and collectively Most of the symposium papers on the ethnicity of Jewish people and the social groups they form draw heavily on the case of American Jews while others offer wider geographical perspectives Contributors address ex Soviet Jews in Philadelphia comparing them to a similar population in Tel Aviv Communism and ethnicity intermarriage and group blending American Jewish dialogue and German Jewish migration in the interwar decades Leading academics employing a variety of social scientific methods and historical paradigms propose to enhance the clarity of definitions used to relate ethnic identity to the Jews They point to ethnic experience in a variety of different social manifestations language use in social context marital behavior across generations spatial and occupational differentiation in relation to other members of society and new immigrant communities as sub ethnic units within larger Jewish populations They also ponder the relevance of individual experience and preference as compared to the weight of larger socializing factors Taken as a whole this work offers revisionist views on the utility of terms like Jewish ethnicity that

were given wider scope by scholars in the 1960s 70s and 80s **Politics of Eugenics** Alberto Spektorowski, Liza Ireni-Saban, 2013-07-18 This book analyzes whether the new debate on genetics owes a debt to eugenic practices by welfare democracies of 1930s and 1940s More specifically the question is whether precisely the same eugenic rationale used in the 1930s is philosophical akin to a new rationality unfolding in some Western European welfare societies that find themselves trapped in the modern dilemma of choosing between increasing immigration and population growth that leads to economic prosperity on the one hand or halting immigration protecting national identity and suffering economic stagnation on the other By analyzing policies of integration and assisted reproduction technology ART in Northern European nation states such as Sweden Finland Denmark as well as in Israel we find a historical continuity between old eugenics and current reproductive and family planning subsidies and integration policies By focusing on the concept of welfare productionism we trace a continuing rationale between the eugenic policies of the past and current investments of ART These programs are rationalized as universal programs for the whole of the population However in this book the authors suggest that they served the goal of reproducing a productivist national middle class which are enticed to reproduce This work will be of great interest to students and scholars of racism extremism European politics population politics and the social impact of science and technology What Are Jews For?
