Social Dimension Of Family Treatment:

Social Dimension of Family Treatment Danuta Mostwin, 1980 *The Social Dimension of Family Treatment* National Catholic School of Social Service (U.S.), 1976 *Social Aspects of the Treatment of the Insane* Jacob Alter Goldberg, 1921

Handbook of Behavioural Family Therapy Ian Falloon, 2015-07-30 First published in 1988 behavioural family therapists worked in an area that had greatly changed since its inception over 20 years before Growing out of the pioneering work of Gerald Patterson Robert Paul Liberman and Richard Stuart whose backgrounds vary from psychology to psychiatry to social work behavioural family therapy BFT had evolved to encompass systems theory considerations of the therapeutic alliance as well as approaches to accounting for and restructuring family members subjective experiences through cognitive strategies As BFT had not been the brain child of any one charismatic innovator but rather of a wide array of clinicians and researchers developing and rigorously testing hypotheses it is fitting that this much needed summation of the field was a collaborative product of an array of well established practitioners of the time They discuss in Part 1 of the book the theoretical parameters of BFT focusing on modular behavioural strategies the indications for therapy assessment of family problems pertinent issues arising in clinical practice and approaches to the problem of resistance to change Contributors to Part 2 then apply theory to such clinical situations as parent training and helping families cope with patients suffering from developmental disabilities alcoholism schizophrenia senile dementia as well as anxiety obsessive compulsive and depressive disorders Specific attention is also given to acute inpatient and primary health care settings While BFT had already proved quite effective in treating a great number of family problems it was only in its infancy at the time of writing As Falloon says in his overview all exponents of the method are constantly involved with the process of refinement each clinician is a researcher each family member is a research subject and each researcher is contributing to clinical advancement This openness in combination with a willingness to modify sacred tenets of behaviourism while adapting proven techniques from other family therapies made this title a landmark in its field As such it was not only of interest to all clinicians and researchers with a behavioural slant but also to all family therapists who wished to challenge themselves to develop an integrative approach *Circumplex Model* David Olson, Candyce Smith Russell, Douglas H Sprenkle, 2014-04-23 This functional new volume introduces professionals to the Circumplex Model of Family Systems one of the most respected and widely used approaches of its kind in family studies Internationally known scholar practitioners in the marriage and family therapy field demonstrate how the model can be used to assess couple and family dynamics and plan treatment interventions They extend the use of the Circumplex Model for treating problem families using a range of clinical interventions at both the family level and broader social system level including specific treatment populations sex offenders juvenile delinquents truants and multi problem families Designed as a multidisciplinary resource this authoritative and accurate volume will assist social workers psychologists pastoral counselors family therapists and other mental health professionals who work with individuals in a family treatment context
