Social Institutions Ibn Khalduns Social Thought:

Social Institutions Fuad Baali, 1992-06-30 This book deals with Ibn Khaldun's social perspective of the major institutions the family education religion politics and economics The family is seen in its association with city life The role of the family and education in the development of human personality is emphasized Ibn Khaldun dealt with the social dimension of knowledge in its many ramifications Religion is discussed by stressing the social perspective rather than the theological especially the reciprocal relationship between group solidarity and religion Moreover social solidarity plays a dynamic role in the formation and decline of political groups Even economic activities are culturally defined Such activities have a great impact upon social interaction especially in dealing with the value of human labor and socioeconomic stratification In spite of its highly innovative appearance the Khaldunian theory was a product of a long series of the Islamic Arabic movements of thought

A History of Social Thought Emory Stephen Bogardus, 1922 Applying Ibn Khaldūn Syed Farid Alatas, 2014-06-05 The writings of Ibn Khaldūn particularly the Muqaddimah Prolegomenon have rightly been regarded as being sociological in nature For this reason Ibn Khaldūn has been widely regarded as the founder of sociology or at least a precursor of modern sociology While he was given this recognition however few works went beyond proclaiming him as a founder or precursor to the systematic application of his theoretical perspective to specific historical and contemporary aspects of Muslim societies in North Africa and the Middle East The continuing presence of Eurocentrism in the social sciences has not helped in this regard it often stands in the way of the consideration of non Western sources of theories and concepts This book provides an overview of Ibn Khaldūn and his sociology discusses reasons for his marginality and suggests ways to bring Ibn Khaldūn into the mainstream through the systematic application of his theory It moves beyond works that simply state that Ibn Khaldūn was a founder of sociology or

provide descriptive accounts of his works Instead it systematically applies Khald n s theoretical perspective to specific historical aspects of Muslim societies in North Africa and the Middle East successfully integrating concepts and frameworks from Khald nian sociology into modern social science theories Applying Ibn Khald n will be of interest to students and scholars of sociology and social theory

sociology and neglected thinkers it highlights the biases of Eurocentrism and androcentrism while also offering much needed correctives to them The authors challenge a dominant account of the development of sociological theory which would have us believe that it was only Western European and later North American white males in the nineteenth and early twentieth century who thought in a creative and systematic manner about the origins and nature of the emerging modernity of their time This integrated and contextualised account seeks to restructure the ways in which we theorise the emergence of the classical sociological canon This book's global scope fills a significant lacuna and provides a unique teaching resource to students of classical sociological theory

Political Transformation of Gulf Tribal States Shaul Yanai, 2014-09-01 The reform movements and attempts to establish parliamentary institutions in the Persian Gulf states of Kuwait Bahrain and Dubai between the First World War and the independent era of the 1970s were not inspired by western example or by any tradition of civil representation The move to a parliamentary system not only represented a milestone in the history of the region creating a legacy for future generations but was a unique transition in the Arab world The transformation of these states from loose chiefdoms of minimal coherence and centralization into centralizing and institutionalized monarchies involved the setting up of primary institutions of government the demarcation of borders and establishment of a monarchical order As this new political and social order evolved ideas of national struggle and national rights penetrated Gulf societies Gulf citizens who had spent time in Arab states mostly in Egypt and Iraq took part in the genesis of a public Arab Gulf national discourse enabling the Gulf population to become acquainted with national struggles for independence As a result merchants of notable families newly educated elements and even workers began to oppose the dominance of the rulers Both the rulers and the commercial elites including members of the ruling families tried to formulate a new and different social contract with the rulers seeking to entrench their political power by using new administrative means and financial power Opposition against this current crystallized in 1938 among the ranks of the commercial oligarchy as well as within the ruling families In spite of its failure to create its own political institutions the oligarchy remained the foremost social and economic class But the ruling families could no longer treat national oil revenues as their private income and they began to channel part of these funds to public needs The most important consequence of the 1938 movement was the formation of a new social contract between the two traditional power centers the governing structures were fitted into the political and economic reality brought about by the oil wealth but remained essentially tribal and committed to the power division between the major Gulf families

Key theories are integrated with biographical sketches of theorists and are placed in their historical and intellectual context. This text helps students better understand the original works of classical and modern theorists and enables them to compare and contrast the latest substantive concepts. The Historical Sketch chapters contain new material on the historical significance of early women founders and on the contributions of W. E. B. Du Bois. Chapters on Marx, Durkheim, Weber, and Simmel now conclude with sections on contemporary applications of ideas from these 19th-century thinkers. A new chapter focuses on theories of race, racism, and colonialism, as well as theories about indigenous peoples and theories from the Global South that challenge the work of scholars from Europe and North America. The concluding chapter has a new section on theories of prosumption, one of the newest developments in consumer theory. New material on colonization, women, classical theorists, and race theory, as well as new timelines, added to history chapters.

A History of Ottoman Economic Thought Fatih Ermiş, 2013-12-04. The Ottoman Empire (1299-1923) existed at the crossroads of the East and the West. Neither the history of Western Asia nor that of Eastern Europe can be fully understood without knowledge of the history of the Ottoman Empire. The question is often raised of whether or not economic thinking can exist in a non-capitalistic society. In the Ottoman Empire, like in all other pre-capitalistic cultures, the economic sphere was an integral part of social life, and elements of Ottoman economic thought can frequently be found in amongst political, social, and religious ideas. Ottoman economic thinking cannot therefore be analyzed in isolation; analysis of economic thinking can reveal aspects of the entire world view of the Ottomans. Based on extensive archival work, this landmark volume examines Ottoman economic thinking in the classical period using three concepts: humorism, circle of justice, and household economy. Basing the research upon the writings of the Ottoman elite and bureaucrats, this book explores Ottoman economic thinking starting from its own dynamics, avoiding the temptation to seek modern economic theories and approaches in the Ottoman milieu.
