**Climate Crisis and the Democratic Prospect** Frank Fischer, 2017-06-09 Can contemporary democratic governments tackle climate crisis Some argue that democracy has to be a central part of a strategy to deal with climate change Others argue that experience shows it not to be up to the challenge in the time frame available that it will require a stronger hand even a form of eco authoritarianism A question that does not lend itself to an easy assessment this volume seeks to out and assess the competing answers While the book supports the case for environmental democracy it argues that establishing and sustaining democratic practices will be difficult during the global climate turmoil ahead especially in the face of state of emergencies This inquiry undertakes a search for an appropriate political ecological strategy for preserving a measure of democratic governance during hard times Without ignoring the global dimensions of the crisis the analysis finds an alternative path in the theory and practices participatory environmental governance embodied in a growing relocalization movement and global eco localism generally Although such movements largely operate under the radar of the social sciences the media and the political realm generally these vibrant socio ecological movements not only speak to the crisis ahead but are already well established and thriving on the ground including ecovillages eco communes eco neighborhoods and local transition initiatives With the help of these ideas and projects the task is to influence the discourse of environmental political theory in ways that can be of assistance to those who will face climate crisis in its full magnitude

**The Geography of Nostalgia** Alastair Bonnett, 2015-08-11 We are familiar with the importance of progress and change But what about loss Across the world from Beijing to Birmingham people are talking about loss about the loss that occurs when populations try to make new lives in new lands as well as the loss of traditions languages and landscapes The Geography of Nostalgia is the first study of loss as a global and local phenomenon something that occurs on many different scales and which connects many different people The Geography of Nostalgia explores nostalgia as a child of modernity but also as a force that exceeds and challenges modernity The book begins at a global level addressing the place of nostalgia within both global capitalism and anti capitalism In Chapter Two it turns to the contested role of nostalgia in debates about environmentalism and social constructionism Chapter Three addresses ideas of Asia and India as nostalgic forms The book then turns to more particular and local landscapes the last three chapters explore the yearnings of migrants for distant

Reconfiguring the Natures of Childhood Affrica Taylor,2013 In this fascinating new book Affrica Taylor encourages an exciting paradigmatic shift in the ways in which childhood and nature are conceived and pedagogically deployed and invites readers to critically reassess the naturalist childhood discourses that are rife within popular culture and early years education Through adopting a common worlds framework Reconfiguring the Natures of Childhood generates a number of complex and inclusive ways of seeing and representing the early years It recasts childhood as messy and implicated rather than pure and innocent situated and differentiated rather than decontextualized and universal entangled within real world relations rather than protected in a separate space Throughout the book the author follows an intelligent and innovative line of thought which challenges many pre existing ideas about childhood Drawing upon cross disciplinary perspectives and with international relevance this book makes an important contribution to the field of childhood studies and early childhood education and will be a valuable resource for scholars postgraduate students and higher education teachers

Where the Waters Divide Michael Mascarenhas, 2012-07-13 This timely and important scholarship advances an empirical understanding of Canada s contemporary Indian problem Where the Waters Divide is one of the few book monographs that analyze how contemporary neoliberal reforms in the manner of de regulation austerity measures common sense policies privatization etc are woven through and shape contemporary racial inequality in Canadian society Using recent controversies in drinking water contamination and solid waste and sewage pollution Where the Waters Divide illustrates in concrete ways how cherished notions of liberalism and common sense reform neoliberalism also constitute a particular form of racial oppression and white privilege Where the Waters Divide brings together theories and concepts from four disciplines sociology geography Aboriginal studies and environmental studies to build critical insights into the race relational aspects of neoliberal reform In particular the book argues that neoliberalism represents a key moment in time for the racial formation in Canada one that functions not through overt forms of state sanctioned racism as in the past but via the morality of the marketplace and the primacy of individual solutions to modern environmental and social problems Furthermore Mascarenhas argues because most Canadians are not aware of this pattern of laissez faire racism and because racism continues to be associated with intentional and hostile acts Canadians can dissociate themselves from this form of economic racism all the while ignoring their investment in white privilege Where the Waters Divide stands at a provocative crossroads Disciplinarily it is where the social construction of water an emerging theme within Cultural Studies and Environmental Sociology meets the social construction of expertise one of the most contentious areas within the social

sciences It is also where the political economy of natural resources an emerging theme in Development and Globalization Studies meets the Politics of Race Relations an often understudied area within Environmental Studies Conceptually the book stands where the racial formation associated with natural resources reform is made and re made and where the dominant form of white privilege is contrasted with anti neoliberal social movements in Canada and across the globe

**Social Constructions of Water Quality in South Africa** Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government
