Varieties of Capitalism and Europeanization Georg Menz, 2008-11-20 Europeanization has often been conceived as a top down process necessitating implementation and adjustment at the national level However Europeanization can also be conditioned by bottom up national initiatives While recent endeavors in comparative political economy have emphasized the resilience of coordinated market economies few detailed empirical studies have examined to date exactly how different European systems of political economic governance cope with and respond to an European impetus for liberalization This original study of the impact of the EU induced liberalization of service provision on member states argues that innovative national re regulatory strategies may be implemented in response to Europeanization In permitting any company registered in an EU member state to provide services throughout Europe new possibilities were created for the transnational posting of workers from low wage to high wage countries However high wage countries could re regulate the wage levels applicable to such employees The exact nature of such response strategy is coloured by the respective institutional power that labour market interest associations like trade unions and employer associations command Therefore different institutionalised varieties of capitalism generate distinct re regulations of the Single European Market Drawing on detailed case studies of ten European countries this volume bridges the gap between the rapidly unfolding scholarly debate on Europeanization and varieties of capitalism It argues that both strongly neocorporatist systems of political economic governance and statist systems are capable of creating swift comprehensive and thorough national re regulations This applies to Austria and France but also Sweden Denmark Norway Finland Belgium and Luxembourg By contrast countries with less strongly embedded neocorporatist structures in which due to organizational deficiencies trade unions face difficulties blocking employer demands create liberal response strategies permitting a stratification of wage levels Hence both Germany and the Netherlands implemented liberal business friendly re regulations The volume makes the case for important amendments to existing accounts of Europeanization and varieties of capitalism Scholars of Europeanization need to incorporate bottom up re regulation into their conceptual framework particularly in response to negative integration Recent strides in comparative political economy have placed great emphasis on continued divergence yet this study suggests that even within the presumably unified group of non liberal coordinated market economies important institutional differences produce very distinct responses in the face of European liberalization

Parties, Elections, and Policy Reforms in Western Europe Kerstin Hamann, John Kelly, 2010-11-02 Social pacts policy agreements between governments labor unions and sometimes employer organizations began to emerge in many countries in the 1980s The most common explanations for social pacts tend to focus on economic factors influenced by industrial relations institutions such as highly coordinated collective bargaining This book presents and tests an alternative and complementary explanation highlighting the electoral calculations made by political parties in choosing pacts Using a dataset covering 16 European countries for the years 1980 2006 as well as eight in

depth country case studies the authors argue that governments choice of social pacts or legislation is less influenced by economic problems but is strongly influenced by electoral competition Social pacts will be attractive when party leaders perceive them to be helpful in reducing the potential electoral costs of economic adjustment and wage restraint policies Alternatively parties may forgo negotiations with social partners and seek to impose such policies unilaterally if they believe that approach will yield electoral gain or minimize electoral costs By combining the separate literatures on political economy and party politics the book sheds new light on the dynamics of social pacts in Western Europe This book will be of interest to students and scholars of political science economics political economy European Studies and comparative politics

Freeman,2018-08-06 Events of the 1970s and 1980s have provoked intense controversy about the desirability of existing political and economic institutions On the basis of an analysis of social welfare in varying types of market systems and in certain democratic political systems **Democracy and Markets** illuminates alternative directions for institutional reform Examining in detail the experiences of several democratic European countries John R Freeman considers whether a mixed ownership structure is preferable to a private ownership structure and whether a pluralist type of democratic politics is preferable to a corporatist type Freeman compares the benefits of the two economic and two political systems separately and then analyzes the workings of four basic political economies This analysis yields a welfare taxonomy for alternative forms of democratic capitalism and more specifically a characterization of the blends of collective gain and distributional equity that can be achieved in the four systems Freeman demonstrates the validity of this taxonomy through an empirical investigation of the political economies of Britain Austria Sweden and Italy Under current conditions he concludes the corporatist mixed system produces the most desirable blend of welfare outcomes **Conflict Management** Stephan Proksch,2016-07-14 This book draws on a wide range of practical examples to describe how conflicts within organisations are traditionally managed and the complementary conflict management methods that can be employed Stephan Proksch clearly explains these innovative methods and their potential applications The central focus is on mediation as an effective form of conflict resolution Discussion and questioning techniques as conflict management tools are explained in simple and concise terms
