Erin Hannah, James Scott, Silke Trommer

#### **Social Theory Of The Wto Trading Cultures:**

A Social Theory of the WTO J. Ford, 2003-08-19 Traditional theories suggest that developing countries lack influence in the trade regime In this text Jane Ford uses a social theory or constructivist approach to show that developing countries played a critical role in strengthening multilateralism in the World Trade Organization A Social Theory of the WTO J. Ford, 2003-08-19 Traditional theories suggest that developing countries lack influence in the trade regime In this text Jane Ford uses a social theory or constructivist approach to show that developing countries played a critical role in strengthening multilateralism in the World Trade Organization **Transformations in Trade Politics** Silke Trommer, 2014-01-23 This book examines the evolution and application of participatory trade politics in West Africa and discusses the theoretical implications for political economy and global governance approaches to trade policy making The author traces the involvement of a network of West African global justice Non Governmental Organizations NGO local NGO and movement platforms and trade unions in the negotiations for an Economic Partnership Agreement with the European Union Building on this empirical analysis she develops a theoretical framework of trade policy formation that is not limited to conceptualizing trade as a policy field aimed exclusively at regulating exporting and importing activities in the global economy Instead she analyzes how material and ideational spheres interact in the way in which communities set the rules that enable them to trade across long distances Attempting to reconcile demands for inclusivity with current economic policy making the author reframes the way in which we theoretically pose questions of who makes trade policy decisions through which mechanisms and why trade policy making practices change or resist change Transformations in Trade Politics will be of interest to students and scholars of International Political Economy Global Governance Social Movement Studies International Economic Relations International Trade Relations African Politics The Politics of African International Development EU politics and EU African Relations Routledge Handbook of International Organization Bob Reinalda, 2013-06-07 This Handbook brings together scholars whose essays discuss significant issues with regard to international organization as a process and international organizations as institutions Although the focus is on intergovernmental organizations IGOs non governmental organizations NGOs are discussed where relevant The handbook is divided into six parts Documentation Data Sets and Sources International Secretariats as Bureaucracies Actors within International Bureaucracies Processes within International Bureaucracies Challenges to International Organizations and Expanding International Architectures The state of the art articles are meant to encourage current and future generations of scholars to enjoy working in and further exploiting the field and are also of great interest to practitioners of international organization and global governance Constructing Global Order Amitav Acharya, 2018-03-22 For a long time international relations scholars have adopted a narrow view of what is global order who are its makers and managers and what means they employ to realize their goals Amitav Acharya argues that the nature and scope of agency in the global order who creates it and how needs to be redefined and broadened Order is

built not by material power alone but also by ideas and norms While the West designed the post war order the non Western countries were not passive They contested and redefined Western ideas and norms and contributed new ones of their own making This book examines such acts of agency especially the redefinitions of sovereignty and security shaping contemporary world politics With the decline of Western dominance ideas and agency from the Rest may make it possible to imagine and build a truly global order WTO's Legal Regime on Subsidies and Its Impact on Social And Economic Justice As Enshrined in The Indian Constitution Dr. A. S. Rao, 2023-10-20 It is a known fact that David Ricardo was the first to clearly articulate the benefits of free trade If one looks at that the economists entrepreneurs and politician vigorously stressing the gains of free trade one would expect free trade to flourish in international trade without any barriers but protectionism in the form of subsidies still persists The volume of international trade and foreign investment has increased substantially since the end of World War II but so has protection All countries practice some type of protectionism in the form of tariffs subsidies and more generally non tariff barriers NTBs However governments world over have in the last 20 years signaled they supported the free trade But the failure for an agreement at the WTO meetings is a proof to the resilience of the protection and the ability of the special interests to get what they want out of their governments 1 State Subsidies in the Global Economy by Nikolaos Zahariadis Palgrave Macmillan New York 2008 Chpater 1 A Dictionary of International Trade Organizations and Agreements Patrick Holden, 2011-05-28 This new title examines international trade organizations and the The Language of World Trade Politics Klaus Dingwerth, Clara Weinhardt, 2018-08-30 agreements that govern them Outcomes in major multilateral trade negotiations are conventionally explained as resulting from interests weighted by trading power Offering a different overview of the concepts we use to talk about the international trade regime this edited collection puts the ideational foundation of world trade politics centre stage and critically examines the terms in which we make sense of world trade politics. The concepts used to make sense of world trade politics are often employed strategically making some aspects of reality visible and others invisible Reflecting upon ten key concepts from trade itself to protectionism and justice this book poses two broad questions first how and by whom have the meanings of different terms used to describe challenge and defend world trade politics been constructed Second how have the individual terms changed over time and with what consequences The editors and contributors draw on a broad range of theoretical approaches from post structuralism or cognitivism to normative theory shedding new light on why certain trade issues and agendas win out over others who benefits from the current system of trade governance and what contemporary challenges the World Trade Organization faces In doing so the book speaks to a growing and diverse constructivist literature in International Political Economy This book will be of interest to scholars students and policy professionals working within International Relations International Political Economy and economics Middle Powers in World Trade Diplomacy C. Efstathopoulos, 2015-03-01 Examining how leading developing countries are increasingly shaping international economic

negotiations this book uses the case studies of India and South Africa to demonstrate the ability of states to exert diplomatic influence through different bargaining strategies and represent the interests of the developing world in global governance

China and Global Trade Governance Ka Zeng, Wei Liang, 2013-12-13 China's historic accession to the World Trade Organization WTO in November 2001 not only represents an important milestone in the country's transition to a market economy and integration into the global economy but is also among the most important events in the history of the WTO and the multilateral trading system China and Global Trade Governance China's First Decade in the World Trade Organization provides us with some fresh empirical data to assess the country's behaviour in the liberal international economic regime Such an assessment is both timely and necessary as it can help us better understand China's role in the evolving structure of global economic governance in addition to shedding light on the broader debate about the implications of the rise of China for the international system Through a thorough examination of China's WTO compliance record and its experience in multilateral trade negotiations this book seeks to better understand the sources of constraints on China's behaviour in the multilateral trade institution as well as the country's influence on the efficacy of the World Trade Organization In doing so this project speaks directly to the following questions raised by China's unprecedented ascent in the international system Is China a rule maker rule follower or rule breaker in international regimes Is Beijing a responsible stakeholder capable of making positive contributions to global trade governance in the long term The WTO Dispute Settlement System Kati Kulovesi, 2011-01-01 Tensions between economic interests and environmental protection have assumed crisis proportions in awareness at every level of society In particular the World Trade Organization has become entangled in controversies related to legitimacy democracy environmental protection and fragmentation of international law fuelling a contentious debate on the use or abuse of environmental norms at the WTO To a greater degree than any comparable treatment this book focuses on the role of the WTO dispute settlement system in addressing trade environment conflicts Highlighting the ways in which environmental issues challenge the legitimacy of WTO jurisprudence it considers such relevant core issues as the following challenges posed to the WTO by so called andlinkageand issues such as environmental protection labour and investment to what extent the WTO can apply rules of international law e g environmental ones that are not contained in the WTO agreements and concerns over the Dispute Settlement System's lack of democratic accountability in matters of great public interest The study analyses in detail the role of international environmental law in three key WTO cases namely the Shrimp Turtle Hormones and Biotech disputes This deeply informed and thoughtful book is of special importance for its proposals on how the WTO dispute settlement system can improve its legitimacy while respecting the limits of its mandate It will be welcomed by international trade attorneys environmental lawyers concerned academics and students and government officials in both trade and environmental policy Power Transition in the Anarchical Society Tonny Brems Knudsen, Cornelia Navari, 2022-07-09 This book examines the ongoing power transition and its ramifications for world order

from an international society perspective In that perspective the outcome of big changes in the distribution of power is a matter of socialization rather than structural determination or the resilience of the so called Liberal world order Consequently the key question of this book is how the ongoing power transition affects and is affected by the social institutions of world order including sovereignty the balance of power international law diplomacy trade humanitarian intervention national self determination and environmental stewardship The guiding theoretical assumption of the book is that power transition stimulates fundamental institutional change rather than major conflict or a breakdown of international order while international organizations are key arenas for the realization and negotiation of such changes not the victims of hegemonic retreat The argument is pursued in sections on rising and declining powers Anglo America Russia China and the EU among others consequences for the fundamental social institutions and changes in international organizations globally and regionally In combination the chapters reveal the contours of the coming world order The Power to Persuade Angela Geck, 2024-06-03 The Power to Persuade provides an innovative and eye opening analysis of strategic arguing as a means of power in global politics Based on an empirical case study of arguing processes in the World Trade Organization WTO the book shows how discursive contexts institutional norms and procedures and unequal human resources condition who has the power to persuade While accounts of arguing in international relations are typically based on a notion of arguing as a power free mode of interaction oriented towards understanding Angela Geck shows how such an approach precludes the question of persuasive power Drawing on in depth interviews with Geneva diplomats and a document based analysis of the negotiations on two Doha Round issues the book examines the practices governing strategic arguing in the WTO and uncovers two sources of persuasive power firstly prevalent discourses and connected regime norms empower some actors over others secondly their ability to debate is conditioned by exclusionary procedures and unequal human resources Offering a grounded theory of strategic arguing in trade politics The Power to Persuade presents a novel analysis of the relationship between arguing and power Writing Global Trade Governance Michael Strange, 2013-08-15 Writing Global Trade Governance operationalises a key post structuralist methodology in order to expand understanding on the institution at the heart of the global political economy Despite the WTO's centrality and the growing popularity of methods utilizing discourse theory no other text has yet demonstrated how these two fields of learning can be productively combined The book seeks to move beyond existing literatures that assume the WTO to be a structure institution or normative framework in order to enquire into the discursive processes of identity formation that make the WTO both possible and contested The book criticises conventional approaches that treat critical civil society as distinct to the WTO arguing instead that it is only through including such social practices within the field of relations making the WTO that we can properly understand what makes the WTO work The book presents an empirical analysis of the discursive character of the present day WTO including its formation and operation and then moves on to evaluate how it is subject to change within a broader social context The final

stage of the book seeks to discuss the impact of the findings on future research both on the WTO and other institutions This work is a significant intervention in the literature on the World Trade Organization and the politics of global trade and social movements and will be of great interest to students and scholars of global governance discourse theory and international organizations. **Transnational Governance** Scott Mann,2016-02-17 As globalization continues to spread and evolve so nation states attempt to govern financialization tax evasion corruption terrorism civil and military conflicts and environmental dangers social polarization and the complexities in human rights implementation by institutional and transnational means This volume discusses these issues from different legal perspectives and highlights the challenges of governing human activity in an age of remarkable interconnectedness Covering a broad range of policy areas and analysis of emerging forms of governance from liberal to critical and Marxist the chapters are legal in their approach and form an important contribution to the growing study of emergent forms of authority coordination and power developing in response to the challenges presented by some of the key contemporary governance issues in the first half of the twenty first century

International Relations Theory and Regional Transformation T. V. Paul, 2012-02-23 A comprehensive treatment of regional transformation offering insights from different theoretical perspectives and generating a range of policy relevant Fairness in the World Economy Americo Beviglia Zampetti, 2006-01-01 Americo Beviglia Zampetti s Fairness in the ideas World Economy provides an important lens into understanding fairness debates in contemporary trade discourse an important contribution to the trade literature the historical excavation that Fairness in the World Economy provides is of great value Students and scholars alike will find Zampetti's clear and concise history of US trade policy from the founding to the present to be extremely useful More importantly at a time when there is widespread argument that too few share in globalization s benefits and too many have no voice in its design and no influence on its course Fairness in the World Economy invites its readers to consider the adequacy of the level playing field notion of fairness and to grapple with the politically contentious question of how trade can help create a more just international economic order Jeffrey L Dunoff The American Journal of International Law This is an unusually timely and insightful work addressing the crucial issue of the justice of globalization The author avoids the polemics and abstractions with which this question is usually treated his economic literacy as well as hands on policy experience in international and transnational institutions make this a uniquely practical balanced and nuanced account bringing much clarity to a heated debate which usually divides the different disciplines and specialities rather than inciting their engagement Robert L Howse University of Michigan Ann Arbor US This volume describes the birth with all the birth defects of the notion of fairness in the US The extent of the author's research is quite breathtaking not only does he delve into an infinite series of official and semi official documents but he also looks at case law opinions expressed in the literature etc to come up with an expression of US fairness that does not suffer from selection bias But this is only half what the author has accomplished through his work He goes on to examine how US

fairness has been exported to international institutions such as the GATT WTO regime and demonstrates how once discussed and shaped among all trading partners it has come back to the US in a different form The book thus provides both the inside out and the outside in perspective It will prove invaluable for the political scientist the economic historian and the lawyer alike Petros C Mavroidis Edwin B Parker Professor of Law Columbia Law School US and University of Neuchatel Switzerland CEPR This book represents a significant scholarly contribution to the field of international political economy with particular respect to the evolution of the multilateral trading system The author engages effectively with the current debate concerning the conflict between the legalistic foundations of the multilateral trading system underpinned by the equality of nation states and the demands for fair trade on the basis of inter personal equity It is a coherent and well researched book on a critically important issue that has not received the significant attention that it deserves within the field of international trade policy Robert Read Lancaster University Management School UK In an international context fairness is particularly important since only a system which is perceived by its participants as fair can command acceptance and compliance The main focus of this study is to investigate the development of the notion of fairness in US trade policy and law as well as the impact this notion has on international trade discussions and rule making and especially on the formation of the multilateral trade regime The contention of the author Americo Beviglia Zampetti is that fairness concerns which have been present in the US trade policy debates and treaty practice since the Republic's inception have contributed to shaping these debates and practice over the years both at home and abroad These concerns were Governments, Non-State Actors and Trade Policy-Making Ann Capling, Patrick Low, 2010-09-09 Examines how non state actors see their interests and seek to influence government policy in relation to PTAs and the WTO Vietnam's New Order S. Balme, M. Sidel, 2016-01-26 This volume brings together distinguished international specialists on Vietnam and its reform process to explore the impact of reform in Vietnam on the Vietnamese state society and order and Vietnam's international and regional environment Expert Knowledge in Global Trade Erin Hannah, James Scott, Silke Trommer, 2015-08-27 This book explores tensions in global trade by examining the role of experts in generating disseminating and legitimating knowledge about the possibilities of trade to work for global development To this end contributors assess authoritative claims on knowledge They also consider structural features that uphold trade experts monopoly over knowledge such as expert language and legal and economic expertise The chapters collectively explore the tensions between actors who seek to effect change and those who work to uphold the status quo exacerbate asymmetries and reinforce the dominant narrative of the global trade regime The book addresses the following key overarching research questions Who is considered to be a trade expert and how does one become a knowledge producer in global trade How do experts acquire disseminate and legitimate knowledge What agendas are advanced by expert knowledge How does the discourse generated within trade expertise serve to close off alternative institutional pathways and modes of thinking What potential exists for the emergence of more emancipatory global trade policies from contemporary

developments in the field of trade expertise This book will be of great interest to students and scholars of IPE Trade Politics International Relations and International Organizations
