The introductory theoretical base of the text highlights the trend toward the generalist perspective and model of practice. Part I provides a historical and theoretical context for social work, including its relationship to other social services. Part II discusses social work practice with individuals, groups and communities, including case work, administration and research. Social work services are discussed in Part III, including the role of social work in mental health, health care, the public schools, public welfare, child and family services, Social Security, the correctional system, the workplace and working with the aged. Areas receiving special attention include drug abuse, work with minorities and social work in rural areas. The Politics of Social Work Fred W. Powell, 2001-05-25. The Politics of Social Work provides a major contribution to debates on the politics of social work at the beginning of the 21st Century. It locates social work within wider political and theoretical debates and deals with important issues currently facing social workers and the organisations in which they work. By setting the current crisis of identity social workers are experiencing in international context, Fred Powell analyses the choices facing social work in postmodern society. Fred Powell explores in this text contemporary and historical paradigms of social work from its Victorian origins to the development of reformist practice in the welfare state to radical social work responses to social exclusion, the renaissance of civil society, multiculturalism, feminism and anti-oppressive practice. In conclusion, he examines the options facing social work in the 21st century and argues for a civic model of social work based on the pursuit of social justice in an inclusive society.

Against Critical Thinking in Health, Social Care and Social Work Tom Grimwood, 2023-09-08 This book stages a provocative dialogue between social work health and social care and contemporary philosophy in order to inform theory and practice in a complex and challenging world Today the social world is marked by deep rooted complexities tensions and challenges Health workers and social workers are constantly reminded to employ critical thinking to navigate this world through their practice But given how many of these challenges pose significant problems for the theories that these subjects have traditionally drawn upon should we now be critical of critical thinking its assumptions its basis and its aspirations itself Arguing that health and social work theory must reconsider its deep rooted assumptions about criticality in order to navigate complex neoliberalism post truth and the relationship between language and late capitalism it examines how the fusion of theory and practice can re imagine critical thinking for health social care and social work It will be of interest to all scholars

students and professionals of social work and health and social care
