Society And Homicide In Thirteenth Century England:

Society and Homicide in Thirteenth-Century England, 1977-06 Homicide was a frequent occurrence in medieval England. Indeed, violence was regarded as an acceptable and often necessary part of life. These are the conclusions reached by the author in his study of homicide patterns in London, Bristol, and five English counties from 1202 to 1276. Using quantitative methods, the author analyzes murder as a social relationship that can tell us much about medieval life and its social organization, much that would otherwise remain unknown. Given, investigates murder rates, violent conflicts between family members, masters, servants, and neighbors, and the collaboration between these same groups in assaulting others. He also explores the socio-economic status of killers and victims, the treatment of killers in court, including what attitudes toward violence can be gleaned from judicial verdicts, the effects of urbanization on patterns of homicide, and social factors that impeded or encouraged recourse to violence.

Landscapes of Fear Yi-Fu Tuan, 2013-04-01 To be human is to experience fear, but what is it exactly that makes us fearful? *Landscapes of Fear*, written immediately after his classic *Space and Place*, is renowned geographer Yi-Fu Tuan's influential exploration of the spaces of fear and of how these landscapes shift during our lives and vary throughout history. In a series of linked essays that journey broadly across place, time, and cultures, Tuan examines the diverse manifestations and causes of fear in individuals and societies; he describes the horror created by epidemic disease and supernatural visions of witches and ghosts; violence and fear in the country and the city; fears of drought, flood, famine, and disease; and the ways in which authorities devise landscapes of terror to instill fear and subservience in their own populations. In this groundbreaking work, now with a new preface by the author, Yi-Fu Tuan reaches back into our prehistory to discover what is universal and what is particular in our inheritance of fear. Tuan emphasizes that human fear is a constant; it causes us to draw what he calls our circles of safety, and at the same time acts as a foundational impetus behind curiosity, growth, and adventure.

Crime and Mentalities in Early Modern England Malcolm Gaskill, 2003-01-30 Crime and law have now been studied by historians of early modern England for more than a generation. *Crime and Mentalities in Early Modern England* attempts to reach further than most conventional treatments of the subject to explore the cultural contexts of law-breaking and criminal prosecution and to recover their hidden social meanings. In this sense, the book is more than just a history from below; it is a history from within. Conversely, the book explores crime to shed light on the long-term development of English mentalities in general. To this end, three serious crimes—witchcraft, coinage, and murder—are examined in detail, revealing new and important insights into how religious reform, state formation, secularisation, and social and cultural change, for example, the spread of literacy and the availability of print, may have transformed the thinking and outlook of most ordinary people between 1550 and 1750.

International Handbook of Violence Research Wilhelm Heitmeyer,John Hagan,2005-08-12 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedhelm Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage

Homicide Martin Daly,Margo Wilson,2017-07-12 The human race spends a disproportionate amount of attention money and expertise in solving trying and reporting homicides as compared to other social problems The public avidly consumes accounts of real life homicide cases and murder fiction is more popular still Nevertheless we have only the most rudimentary scientific understanding of who is likely to kill whom and why Martin Daly and Margo Wilson apply contemporary evolutionary theory to analysis of human motives and perceptions of self interest considering where and why individual interests conflict using well documented murder cases This book attempts to understand normal social motives in murder as products of the process of evolution by natural selection They note that the implications for psychology are many and profound touching on such matters as parental affection and rejection sibling rivalry sex differences in interests and inclinations social comparison and achievement motives our sense of justice lifespan developmental changes in attitudes and the phenomenology of the self This is the first volume of its kind to analyze homicides in the light of a theory of interpersonal conflict Before this study no one had compared an

observed distribution of victim killer relationships to expected distribution nor asked about the patterns of killer victim age disparities in familial killings This evolutionary psychological approach affords a deeper view and understanding of homicidal violence

The Crown Pleas of the Suffolk Eyre of 1240 Eric Gallagher,H. R. T. Summerson,2021 The eyre was an organised judicial visitation to the counties of England by the King s justices to hear all types of plea civil and crown as well as to investigate any matters for the King that pertain to the county it was thus a hugely important part of the legal and administrative process whereas the civil pleas deal primarily with litigation between landowners the crown pleas are mostly concerned with the actions of townsmen and peasants recorded both as killers and thieves and as the victims of crime back cover
