**Loglinear Models with Latent Variables** Jacques A. Hagenaars, 1993-08-09 Sociologists with a quantitative bent will doubtless find it useful well written with a wealth of explanation Dougal Hutchison in Educational Research Loglinear Models with Latent Variables by Jacques A Hagenaars is a timely contribution to the literature that serves to inform researchers of the richness of loglinear approaches to analyzing latent categorical variables The author provides a clear exposition of the loglinear model Scott L Hershberger in Structural Equation Modeling Since the 1980s the loglinear model has become the dominant form of categorical data analysis as researchers have expanded it into new directions Jacques A Hagenaars book shows researchers the applications of one of these new developments how uniting ordinary loglinear analysis and latent class analysis into a general loglinear model with latent variables can result in a modified LISREL approach This modified LISREL model will enable researchers to analyze categorical data in the same way that they have been able to use LISREL to analyze continuous data Beginning with an introduction to ordinary loglinear modeling and standard latent class analysis Hagenaars explains the general principles of loglinear modeling with latent variables the application of loglinear models with latent variables as a causal model as well as a tool for the analysis of categorical longitudinal data the strengths and limitations of this technique and lastly a summary of computer programs that are available for executing this technique Association Models Raymond Sin-Kwok Wong, 2010-02-09 Many social science data are by nature organized in cross classified formats for example gender and racial differences in the relationship between education and occupation cross national and or temporal changes in patterns of marriage homogamy temporal variations in import export or input output patterns changes in the relationship between class positions party identification and voting and changes in the characteristics of urban neighborhoods in the United States over time While the substantive rationale in exploring their systematic relationship may appear simple and straightforward the application of appropriate statistical tools to decipher and interpret the meaning and complexities of the relationships involved can sometimes be difficult Fortunately with the important pioneering works in this field we now have a large repertoire of statistical models association models in particular which are well suited for such analyses Although association models have been widely utilized by social stratification researchers especially in the study of social mobility and assortative mating such techniques have yet to be widely disseminated to other social science disciplines This is partly because most of the important contributions are scattered in various journals and there has not been any systematic effort to integrate the family of association models into a single coherent framework *Applied Latent Class Analysis* Jacques A. Hagenaars, Allan L. McCutcheon, 2002-06-24 Applied Latent Class Analysis introduces several innovations in latent class analysis to a wider audience of researchers Many of the world's leading innovators in the field of latent class analysis contributed essays to this volume each presenting a key innovation to the basic latent class model and illustrating how it can prove useful in situations typically encountered in actual research **Generating Social Stratification** Alan C

Kerckhoff,2018-03-05 In this book some of the leading stratification scholars in the U S present empirical and theoretical essays about the institutional contexts that shape careers Building on recent advances in theory data and analytic technique the essays in this volume work toward the goal of identifying and assessing the processes by which a birth cohort is distributed in the stratification system given their positions of origin in that system Alan Kerckhoff s introduction situates the studies in this volume within the context of previous stratification research over several generations making the book an invaluable resource for scholars and graduate students      **Survey Research Methodology, 1990-1999** Graham R.

Walden,2002-09-30 Survey research is one of the most widely used research methodologies across the social and behavioral sciences Two trends that have had a major impact on the development of survey methods over the last decade are 1 the application of techniques and theories from cognitive psychology to the understanding and reduction of survey measurement error and 2 the application of new computer and telephony technologies to data collection and analysis These trends and other emerging issues from the 1990 s literature on survey research methods are captured here in 617 detailed annotations to monographs journals government documents dissertations and ERIC documents Annotations include examples from business criminology education health and medicine law library science mass media military science political science psychology sociology social work religion and women s studies The bibliographic entries provide every useful element including series names complete subtitles and overall text page numbers as well as chapter page numbers The extensive annotations are more complete and more detailed than is typical for annotated bibliographies The descriptions include highlights of the study data and sufficient detail to enable the reader to make an informed choice as to whether to seek the full text Appendices include journals cited and the major survey research organizations The annotations are easily accessed through author and subject indexes      *Envisioning the Survey Interview of the Future* Frederick G. Conrad,Michael F.

Schober,2007-12-10 Praise forEnvisioning the Survey Interview of the Future This book is an excellent introduction to some brave new technologies and their possible impacts on the way surveys might be conducted Anyone interested in the future of survey methodology should read this book Norman M Bradburn PhD National Opinion Research Center University of Chicago Envisioning the Survey Interview of the Future gathers some of the brightest minds in alternative methods of gathering self report data with an eye toward the future self report sample survey Conrad and Schober by assembling a group of talented survey researchers and creative inventors of new software based tools to gather information from human subjects have created a volume of importance to all interested in imagining future ways of interviewing Robert M Groves PhD Survey Research Center University of Michigan This collaboration provides extensive insight into the impact of communication technology on survey research As previously unimaginable communication technologies rapidly become commonplace survey researchers are presented with both opportunities and obstacles when collecting and interpreting data based on human response Envisioning the Survey Interview of the Future explores the increasing influence of emerging technologies on the

data collection process and in particular self report data collection in interviews providing the key principles for using these new modes of communication With contributions written by leading researchers in the fields of survey methodology and communication technology this compilation integrates the use of modern technological developments with established social science theory The book familiarizes readers with these new modes of communication by discussing the challenges to accuracy legitimacy and confidentiality that researchers must anticipate while collecting data and it also provides tools for adopting new technologies in order to obtain high quality results with minimal error or bias Envisioning the Survey Interview of the Future addresses questions that researchers in survey methodology and communication technology must consider such as How and when should new communication technology be adopted in the interview process What are the principles that extend beyond particular technologies Why do respondents answer questions from a computer differently than questions from a human interviewer How can systems adapt to respondents thinking and feeling What new ethical concerns about privacy and confidentiality are raised from using new communication technologies With its multidisciplinary approach extensive discussion of existing and future technologies and practical guidelines for adopting new technology Envisioning the Survey Interview of the Future is an essential resource for survey methodologists questionnaire designers and communication technologists in any field that conducts survey research It also serves as an excellent supplement for courses in research methods at the upper undergraduate or graduate level

**The Palgrave Handbook of Survey Research** David L. Vannette, Jon A. Krosnick, 2017-12-21 This handbook is a comprehensive reference guide for researchers funding agencies and organizations engaged in survey research Drawing on research from a world class team of experts this collection addresses the challenges facing survey based data collection today as well as the potential opportunities presented by new approaches to survey research including in the development of policy It examines innovations in survey methodology and how survey scholars and practitioners should think about survey data in the context of the explosion of new digital sources of data The Handbook is divided into four key sections the challenges faced in conventional survey research opportunities to expand data collection methods of linking survey data with external sources and improving research transparency and data dissemination with a focus on data curation evaluating the usability of survey project websites and the credibility of survey based social science Chapter 23 of this book is open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com)

*Respecifying Lab Ethnography* Philippe Sormani, 2016-04-08 *Respecifying Lab Ethnography* delivers the first ethnomethodological study of current experimental physics in action describing the disciplinary orientation of lab work and exploring the discipline in its social order formal stringency and skilful performance in situ and in vivo Drawing upon extensive participant observation this book articulates and draws upon two major strands of ethnomethodological inquiry reflexive ethnography and video analysis In bringing together these two approaches which have hitherto existed in parallel *Respecifying Lab Ethnography* introduces a practice based video analysis In doing so the book recasts conventional distinctions to shed fresh light on methodological

issues surrounding the descriptive investigation of social practices more broadly An engaged and innovative study of the encountered worksite this book will appeal not only to sociologists with interests in ethnomethodology and the sociology of work but also to scholars of science and technology studies and those working in the fields of ethnography and social science methodology

**Mapping Scientific Method** Gita Chadha, Renny Thomas, 2022-07-19 This volume explores how the scientific method enters and determines the dominant methodologies of various modern academic disciplines It highlights the ways in which practitioners from different disciplinary backgrounds the humanities the natural sciences and the social sciences engage with the scientific method in their own disciplines The book maps the discourse within each of the disciplines that critiques the scientific method from different social locations in order to argue for more complex and nuanced approaches in methodology It also investigates the connections between the method and the structures of power and domination which exist within these disciplines In the process it offers a new way of thinking about the philosophy of the scientific method Part of the Science and Technology Studies series this volume is the first of its kind in the South Asian context to debate scientific methods and address questions by scholars based in the global south It will be useful to students and practitioners of science humanities social sciences philosophy of science and philosophy of social science Research scholars from these disciplines especially those engaging in interdisciplinary research will also benefit from this volume

Nergiz,2014-10-14 This volume establishes a new agenda for approaches to migration research and the corresponding methodologies A wide range of international contributors focus on the question of how to overcome the so called methodological nationalism within empirical studies on migration They address two main challenges how to contextualize the empirical research field and how to deal with national and ethnic categorizations within the empirical studies Methodologies on the Move outlines first of all a new epistemological basis for migration research which is pinpointing the relational concept of space Second building on the multi sided method of ethnography it provides detailed insights into novel qualitative and quantitative research designs Third it presents innovative data collection methods on geographic and virtual mobility and on cross border social practices This volume transcends the early criticisms of methodological nationalism in migration research and suggests both general methodological lines as well as helpful tools for

empirical analysis This book was originally published as a special issue of Ethnic and Racial Studies **Building Corporate Identity, Image and Reputation in the Digital Era** T C Melewar, Charles Dennis, Pantea Foroudi, 2021-07-29 Brands corporate products service today are collectively defined by their customers deriving from personal experiences and word of mouth This book acts as a forum for examining current and future trends in corporate branding identity image and reputation Recognising the complexity and plurality at the heart of the corporate branding discipline this book fills a gap in the literature by posing a number of original research questions on the intrinsic nature of corporate branding ideas from corporate external and organisation internal identity perspectives as they relate to brand management corporate reputation marketing communications social media smart technology experiential and sensory marketing It incorporates current thinking and developments by both multidisciplinary academics and practitioners combining a comprehensive theoretical foundation with practical insights The text will serve as an important resource for the marketing identity and brand practitioners requiring more than anecdotal evidence on the structure and operation of stakeholders communication in different geographical areas It determines current practices and researches in diverse areas regions and commercial and non commercial sectors across the world The book provides scholars researchers and postgraduate students in business and marketing with a comprehensive treatment of the nature of relationships between companies brands and stakeholders in different areas and regions of the world *Statistical Models for Ordinal Variables* Clifford C. Clogg, Edward S. Shihadeh, 1994-02-28 How should data involving response variables of many ordered categories be analyzed What technique would be most useful in analyzing partially ordered variables regarded as dependent variables Addressing these and other related concerns in social and survey research Clogg and Shihadeh explore the statistical analysis of data involving dependent variables that can be coded into discrete ordered categories such as agree uncertain disagree or in other similar ways The authors emphasize the applications of new models and methods for the analysis of ordinal variables and cover general procedures for assessing goodness of fit review the independence model and the saturated model define measures of association demonstrate the logit versions of the model and develop association models as well as logit type regression models Aimed at helping researchers formulate models that take account of the ordering of the levels of the variables this book is appropriate for readers familiar with log linear analysis and logit regression **Social Science for Counterterrorism** Paul K. Davis, Kim Cragin, 2009 Employs an interdisciplinary social science approach to various counterterrorism questions problems and policies **Networks and Markets** James E. Rauch, Alexandra Casella, 2001-06-21 Networks and Markets argues that economists knowledge of markets and sociologists rich understanding of networks can and should be combined Together they can help us achieve a more coherent view of economic life where transactions follow both the logic of economic incentives and the established channels of personal relationships Market exchange is impersonal episodic and carried out at arm s length All that matters is how much the seller is asking and how

much the buyer is offering An economic network by contrast is based upon more personalized and enduring relationships between people tied together by more than just price Networks and Markets focuses on how the two concepts relate to each other Are social networks an essential precondition for successful markets or do networks arise naturally out of markets as faceless traders build reputations and gain confidence in each other The book includes contributions by both sociologists and economists applying the concepts of markets and networks to concrete empirical phenomena Among the topics analyzed the book explains how in Taiwan South Korea and Japan firms combine into tightly knit business blocs how wholesalers in a Marseille fish market earn the loyalty of customers and how ethnic retailers in the U S share valuable market information with other shopkeepers from their ethnic group A response to each chapter discusses the issue from the standpoint of the other discipline Sociologists are challenged to go beyond small scale economic exchange and to integrate their concept of networks into a broader understanding of the economic system as a whole while economists are challenged to consider the economic implications of network ties which can be strong or weak unconditional or highly contingent This book proves that both economics and sociology provide stronger insights when they study markets and networks as parallel forms of exchange But it also clarifies the healthy division of labor that remains between the two disciplines Sociologists are adept at showing how markets are framed by social institutions economists specialize in explaining how markets perform taking the social context as a given Networks and Markets showcases what each discipline does best and reveals where each discipline would do better by borrowing from the other
