Addiction Treatment Daniel Hood, 2017-09-08 Addiction Treatment is an ethnography that compares two types of residential drug free treatment programs religious faith based programs and science based secular programs Although these programs have originated from significantly different ideological bases in examining the day to day operations of each Daniel E Hood concludes that they are far more alike than they are different Drug free treatment today whether in secular or religious form is little more than a remnant of the temperance movement It is a warning to stop using drugs At its best treatment provides practical advice and support for complete abstinence At its worst it demeans users for a form of behavior that is not well understood and threatens death if they do not stop Hood argues that there is no universal agreement on what addiction is and that drug abuse is little more than a catch all term of no specific meaning used to condemn behavior that is socially unacceptable Through extensive participatory observations intimate life history interviews and informal conversations with residents and staff Hood shows how both programs use the same basic techniques of ideological persuasion mutual witnessing methods of social control discourse deprivation and the same proposed zero tolerance abstinent lifestyle Christian living vs Right living as they endeavor to transform clients from addicts to citizens or from sinners to disciples

Polite Politics Denny Ho Kwok-leung, 2020-08-26 This title was first published in 2000 This book contributes to social movement theory and to an understanding of Hong Kong politics through analysis of an urban housing protest movement The theoretical approach adopted is a multi level one and seeks to show the influence of the political context the resources available to the groups concerned the actors interpretations of their situation and their strategy preferences This approach fills a gap in social movement theory because most theoretical frameworks focus on a single level of analysis The book also aims to help researchers in the field to re examine the current development of social movement theories and to learn the specific trajectory of urban social movements in Hong Kong

Racism Matters William D. Wright, 1998-09-24 This work offers a new discussion of racism in America that focuses on how White people have been affected by their own racism and how it impacts upon relations between Blacks and Whites This study draws attention to how racism is distinctly different from race and it shows how since the late 17th century most Whites have been afflicted by their own racism as evidenced by

considerable delusional thinking dehumanization alienation from America and psychological and social pathology White people have created and maintained a White racist America which is the antithesis of liberty equality justice and freedom Black people continue to be the primary victims of this culture Although racism in America has changed since the 1950s and 1960s from a blatant and violent White racist America to a less violent and more subtle White racist America racism still severely hampers the ability of most Blacks to develop and be free The continuing racist context in which Blacks live requires that they organize and use effective group power or Black Power to help themselves One obstacle to Black achievement is the use of intelligence tests which are wholly unscientific and represent a manifestation of subtle White racism A challenge to the writing on race in this country this work focuses on the victims and not the perpetrators **Sociological Abstracts** Leo P. Chall,1996 Exploring Social Change Kevin Leicht,Charles Harper,2018-08-15 Exploring Social Change provides a compelling analysis of theories that explain social change innovation social movements and revolution and concludes with reflections about how individuals do and should live in an uncertain and rapidly changing world Written in a personal and clear manner the authors provide definitions of key terms and analysis of theories and ideas from the study of social change The seventh edition includes updated examples reflecting the social changes that have occurred in the world around us including new discussions on the environmental and social landscapes as well as updated methods and discussions that reflect that changing field of social change study **In Conflict and Order** D. Stanley Eitzen,Maxine Baca Zinn,1993 Broadly viewing the global economy as a political competition that produces winners and losers International Political Economy holistically and accessibly introduces the field of IPE to readers with limited background in political theory history and economics This book surveys major interests and institutions and examines how state and non state actors pursue wealth and power Emphasizing fundamental economic concepts as well as the interplay between domestic and international politics International Political Economy not only explains how the global economy works it also encourages readers to think critically about how economic policy is made in the context of globalization Collective Memory Narratives in Contemporary Culture Antonella Pocecco,Estrella Gualda,Emiliana Mangone,2023-11-27 Starting from the central importance of memory in contemporary societies this book encourages a transdisciplinary reflection on how the presentification of the past is never a simple reenactment but corresponds to the interaction between memory and cultural sensitiveness present beliefs and needs expectations and forecasts for the future It studies cultural re construction through collective stories including academic debates media narratives collective mobilizations state narratives of history architectural reconstructions and artistic expressions It looks at how technological innovations have profoundly changed the practices of conservation and dissemination of collective memory with particular reference to cultural digitization Finally it shows that the relevance and selection of events the organization of connections and cross references between past present and future as well as the importance of diversified collective imaginaries are the keys to narrative constructions of memory that prove to be sensitive

and decisive for its continuity and its intergenerational transmission This interdisciplinary collection is for students and scholars of the social sciences cultural studies and the humanities interested in memory studies **The Politics of Compassion** Michael Ure, Mervyn Frost, 2014-01-10 This book provides a critical overview of the role of the emotions in politics Compassion is a politically charged virtue and yet we know surprisingly little about the uses and abuses of compassion in political environments Covering sociology political theory and psychology and with contributions from Martha Nussbaum and Andrew Linklater amongst others the book gives a succinct overview of the main theories of political compassion and the emotions in politics It covers key concepts such as humanitarianism political emotion and agency in relation to compassion as a political virtue The Politics of Compassion is a fascinating resource for students and scholars of political theory international relations political sociology and psychology
