The increasing focus of countries towards the curbing of tax avoidance and abuse involving hybrid mismatch arrangements culminated in a specific action plan in the BEPS Project being dedicated to the design of domestic rules and the development of treaty provisions that would neutralize the tax effects of such arrangements This volume provides an in depth analysis of various aspects of this topic It is divided into two parts the first dealing exclusively with tax treaty issues arising in connection with hybrid entities and the second dealing with EU tax law issues surrounding hybrid entities The former part comprises chapters analysing how tax treaties have historically dealt with this issue with a focus on domestic court jurisprudence the positions in the OECD and the UN Model Conventions the developments that have come about owing to the BEPS Project and the impact of several existing measures regimes and vehicles on these tax treaty provisions The latter part comprises chapters on how hybrid entities are dealt with under primary EU law under various secondary law directives including the newly enacted Anti Tax Avoidance Directives and an analysis of policy solutions offered in this direction Reform of the Federal Criminal Laws United States.
